

60000982509.txt

Please preserve net neutrality--the Internet was designed around a philosophy of open, peer-to-peer communication, and the fact that all data packets are treated equally.

You don't have to take my word for it--listen to Sir Tim Berners-Lee (inventor of the World Wide Web) who backs net neutrality:
"It's all predicated on a neutral network" -- without net neutrality, the internet will not behave the way it was designed to work.
