

60000982712.txt

The internet is a vast resource of knowledge that is open for anyone and everyone to use, regardless of social or financial status. Tampering with net neutrality will only degrade the internet, allowing the ISPs to "fix" something that is not broken, and destroy the beautiful system that is net neutrality.

Keep the internet free from the control of the ISPs, and please consider filing the internet as a public utility under Title II of the Telecommunications Act.
