ADDRESS: 3610 Misty Oak Dr. apt 1416

POST CODE: 32901

COUNTRY: US

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses

and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Eric Hanson

Date: 09/15/2014 14:46:47

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Greetings. I am writing in concern for the potential limitation of access and high speed service that you are considering applying to the Internet on behalf of certain telecommunication companies. I feel that this is a morally wrong position to pursue as it undermines the purpose of the Internet.

The World Wide Web belongs to everybody. It is the great information highway that connects one side of the world to the other to allow free and open communication. To limit that for the sake of some companies making more money would be to undermine the very purpose of the World Wide Web, and effectively cut off a good many people from family, friends and livelihood.

There are a great many advantages to this equal access to information. It is now easier than ever for independent book authors to find their audience, social gatherings have become commonplace for people with like interests and ideals, and many up and coming acting talents have a venue to showcase their skills and attract a fan base. These types of things are what this push by major telecommunication companies is threatening in their demands to receive payment for faster service. It would be easier for them to push political agendas via suppressing information, and would wrench this safe haven of the first amendment out of the hands of the populace that has treated it so well and responsibly since its birth.

I implore you to reject this push by the telecommunication companies, and hope that you will allow everyone to maintain equal standing on the World Wide Web, where equality for all is insured.

Eric Hanson

The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC's attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Carolyn Wiseley

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining

moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Jay Beach

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we

trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

=====

NAME: Alexander

ADDRESS: Södra stenbocksgatan 83

POST CODE: 25247

COUNTRY: SE

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become

the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Jackie Baker  
Date: 09/15/2014 14:46:52  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said:  
"What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Jackie Baker  
2200 Steward Rd  
Cookeville, Tennessee 38506

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of

unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining

moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Melissa Hernandez  
Date: 09/15/2014 14:46:53  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Melissa Hernandez

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said:  
"What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

joanne truett

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this

reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said: "What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth.

Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

margie valdez

ADDRESS: Sweden

POST CODE: 74732

COUNTRY: SE

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Bernardo Tapia  
Date: 09/15/2014 14:46:57  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Bernardo Tapia

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn't need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

From: bryan hernandez  
Date: 09/15/2014 14:46:58  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an independent agency, and it is no longer an expert agency. If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private

companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an independent agency, and it is no longer an expert agency. If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Shaneca Stewart

920 Poppleton Dr

From: Andrew Allen  
Date: 09/15/2014 14:46:59  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a public utility and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet is the first step in regulating the people who use it. We are a free people, and the FCC needs to leave us alone. If the FCC regulates the Internet after Congress and the courts have told it not to, it will have proven itself to be an unaccountable agency, and the Congress should move to severely limit its powers and budget.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Michelle Humphries  
305 Dr Martin Luther King Jr St S Apt 202  
St Petersburg, Florida 33705

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a public utility and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Troy Stierwalt

NAME: Jesse

ADDRESS: 1900 Big Canyon Drive

POST CODE: 78746

COUNTRY: US

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition.

Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

From: Janet Lighthall

Date: 09/15/2014 14:47:02

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn't need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Janet Lighthall

428 Patterson Ln

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COUNTRY: BE

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning

access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Antonio Ceccatelli  
ADDRESS: V.le L.da Vinci 114  
POST CODE: 00145 Rome, Italy  
COUNTRY: IT

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become

the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Lee Semanek  
Date: 09/15/2014 14:47:09  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I have been using the internet since computers really became useful in the early 90s. The internet is now essential to my very survival. You simply must reclassify the internet as a public utility, just like the radio waves, television waves, cable, etc. It is the only course of action that makes sense.

Just do it. The American people will fight you on this one until you get it right. Now amount of payoff for Chairman Wheeler will be enough allow a pay lane internet to stand.

Sincerely,

Lee Semanek

Lee Semanek

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

ADDRESS: xxxx@xxxx.xxx  
POST CODE: 97219  
COUNTRY: US  
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking,

a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's

government-created monopoly. They are a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform

for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: Tamra Lambides  
Date: 09/15/2014 14:47:14  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler,

Please protect internet neutrality by continuing access exactly as it is now. As they say, don't fix it if it ain't broke. Providing fast lanes only serves a very small percentage of people. I don't want someone else deciding the priority of delivery for me. I should be the only one deciding what I want delivered not some corporation. The internet should be a level playing field for access and allowing corporations or even individuals with large amounts of cash to control it is un-American, inappropriate and the face of it unfair to the average person. The internet is about connecting people to people and people to services they want and need. It should not be controlled by

any organization that limits the scope of availability or profits inequitably by its use of that control.

Sincerely,  
Tamra Lambides

Tamra Lambides

NAME: Cameron

ADDRESS: 11 Renouf Court

POST CODE: 3796

COUNTRY: AU

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: Paul Horne  
Date: 09/15/2014 14:47:17  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Net neutrality has been the default state of the internet since its invention. Internet service providers load all websites at the same speed. Now, Big Telecom wants the FCC to change the rules so they can extract more money from websites and consumers, as we pay all bills, by making them and us pay to be served to customers at faster speeds.

If there is a "fast lane" it is obvious there will also be a "slow lane" which will destroy all Internet Neutrality. Maybe you do not remember when 16 user party lines in the 1950's existed before AT&T finally sold their expensive and monopolistic two user party lines and finally private lines, but I do. It was not until AT&T was split in the 1970's that consumers finally got phone service with more than one extension and with long distance at less than \$01 a minute. This destruction of the Internet Neutrality will be like that in reverse going from freedom to a strict dictatorship of the big 05 monopoly telecom companies. That is not progress,

In order to preserve net neutrality, the FCC needs to ban Big Telecom from creating these so-called "fast-lanes" which only large companies could afford. Start-ups and independent sites like Daily Kos would be left behind and crushed.

In order to legally prevent Big Telecom from destroying net neutrality once again, the FCC should assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. This legal argument offers the most protection for real net neutrality to prevent ISPs from controlling content speed and blocking websites.

Seniors like me depend on the Internet for news and entertainment. As a teacher, I need the Internet for research. As a student, I need the Internet for research and learning. Please do not allow the 01% to totally destroy this communication life line for the public.

Paul Horne

NAME: Sondre Abrahamsen

ADDRESS: Sjøskogenveien 44c

POST CODE: 1407 Vinterbro

COUNTRY: NO

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Deanna Smith  
Date: 09/15/2014 14:47:18  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Deanna Smith  
408 8th St  
Oswego, Kansas 67356

From: Deborah Keefe  
Date: 09/15/2014 14:47:21  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223  
Dear FCC Chair Wheeler,

The internet is my most important link to the world today. It is the conduit of my news, information, social interaction, and work and family relationships. My internet connection is already slower than most because I have the least expensive plan I can buy from my cable provider. It is more of a public utility, more diverse and helpful, and necessary to my life than the telephone. It is not a commodity that should be sold to the highest bidder. Life today necessitates that the internet be treated as a public utility. Please keep access to the net neutral.

Deborah Keefe

From: john kirkendall  
Date: 09/15/2014 14:47:21  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth.

Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

john kirkendall

ADDRESS: 1100 e 2nd st

POST CODE: 78756

COUNTRY: US

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless

of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Paul Ashman

Date: 09/15/2014 14:47:21

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The Internet was started principally with government and academic resources, for the public good.

It has proven an invaluable democratizing resource, the only place in history where small, low-budget interests can instantly have worldwide exposure to, and be in easy contact with, others with similar interests. The result has been a beautiful mosaic of intercultural connection, hobbies, and clearinghouses of information of all sorts, for the public good, as intended.

As digital technology has improved, everyone's hunger for bandwidth has likewise grown to embrace technologies like video. It is fitting that as bandwidth becomes available, it should be equally available to all.

The private companies lobbying you now have been playing, and thriving, all this time, in this public space. Now they are trying to use the resources and strength they gained in the public arena to seize it from us, and monetize it in a new, unnecessary way.

To allow them to steal the commons that weaned them is grossly unjust, and extremely destructive to the public good. I don't know why you, a public official, would give a moment of thought to such a ridiculous proposal.

Please start regulating the internet as a public utility, as it was made to be.

Paul Ashman

From: Hayley Ellsworth Billings  
Date: 09/15/2014 14:47:22  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Hayley Ellsworth Billings

Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides.

Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. From: christena litton  
Date: 09/15/2014 14:47:23  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet is the first step in regulating the people who use it. We are a free people, and the FCC needs to leave us alone. If the FCC regulates the Internet after Congress and the courts have told it not to, it will have proven itself to be an unaccountable agency, and the Congress should move to severely limit its powers and budget.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

christena litton  
3471 S Bender Ave

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling

todayâ\200\231s bipartisan â\200\234Hands off the Netâ\200\235 approach. You canâ\200\231t have â\200\234just enough Title IIâ\200\235 any more than you can be â\200\234slightly pregnant.â\200\235

Title II would hurt startups most: they canâ\200\231t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCCâ\200\231s powers over the Internet. Remember, you wonâ\200\231t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you donâ\200\231t intend.

Yet, as youâ\200\231ve noted, Title II wouldnâ\200\231t even allow the FCC to do what its proponents demand: ban â\200\234fast lanes.â\200\235

We urge you to carefully focus regulation on real problems, what Chairman Kennard called â\200\234vigilant restraint.â\200\235 But remember Kennardâ\200\231s digital mantra, too: â\200\234First, do no harm.â\200\235 If you conclude that existing laws arenâ\200\231t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCCâ\200\231s authority. No government agency should be trusted with a blank check to regulate the Internet at whim â\200\224 whether thatâ\200\231s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an independent agency, and it is no longer an expert agency. If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining

moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband

access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

=====  
From: Quashon Smith  
Date: 09/15/2014 14:47:24  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an independent agency, and it is no longer an expert agency. If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Quashon Smith  
5730 Meadowbrook Dr Apt 140

From: xxxx@xxxx.xxx  
Date: 09/15/2014 14:47:25  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Patrick Doherty  
7016 Northlake Dr  
Jacksonville, AR 72076

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Jeff Haag

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====  
From: xxxx@xxxx.xxx  
Date: 09/15/2014 14:47:27  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Tony Masarweh  
14667 Loyola St  
Moorpark, CA 93021

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change\200\224and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

If the federal government goes through these plans to regulate the internet, I know that the internet will change\200\224and not for the better.

Regulating the Internet is the first step in regulating the people who use it. We are a free people, and the FCC needs to leave us alone. If the FCC regulates the Internet after Congress and the courts have told it not to, it will have proven itself to be an unaccountable agency, and the Congress should move to severely limit its powers and budget.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

It doesn't take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn't matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Joshua Mata  
2108 Dutton Ave  
Waco, TX 76706

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will

change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said: "What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

From: xxxx@xxxx.xxx  
Date: 09/15/2014 14:47:30  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx  
Date: 09/15/2014 14:47:31  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear - investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Angie Watkins

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$0.1 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim, whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will

change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Delores Craig

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the

so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the

future of internet freedom here in America.

Sincerely,  
James Robinson  
2257 Rose Ave  
Hemet, CA 92545

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Brent Popham

=====  
From: Donald Raney  
Date: 09/15/2014 14:47:34  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for

government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Donald Raney

through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years -- that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers & just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Antonio Arce

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC's attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Dan Fiedler

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Martha Simoni

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to

increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Barbara Sage  
Date: 09/15/2014 14:47:37  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Barbara Sage

Springfield, Missouri 65804

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would

justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Dawn Brooks

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear - investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should

continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

It doesn't take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn't matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

From: xxxx@xxxx.xxx  
Date: 09/15/2014 14:47:38  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Jobert Solima  
1728 Ashford St

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers & just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Kim Crist

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Stephanie Cooper

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly

socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC's attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administration and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Corey Vangundy  
Date: 09/15/2014 14:47:42  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job - providing more spectrum for wireless users or deregulating wireline telephone service - it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Corey Vangundy  
1030 Hemlock St  
Celina, Ohio 45822

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it

in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the

so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of

unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Viki Miller  
Po Box 642  
Janesville, CA 96114

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said: "What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

From: Joe Bennett  
Date: 09/15/2014 14:47:43  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rule making, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present form.

Like many Americans, I believe that the internet should remain free of government

control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the

other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Terresa Brewer

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear: investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a public utility and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Astra Jade

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political

agenda, then it is no longer an independent agency, and it is no longer an expert agency. If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

NAME: Leif

ADDRESS: Mariebergsvägen 12, KARLSKRONA

POST CODE: S 37143

COUNTRY: SE

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal

would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Carlton Gilliam  
970 Stoney Creek Ln  
Austell, GA 30168

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it

affords for innovation, economic development, communication, and democracy itself.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Kathi Holloway

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years - that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers - just in case they might do something wrong

someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Grady Stiles  
5306 N Rome Ave

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable

will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Alicia Hays

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Heidi Pankow

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge

you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

NAME: Sergej Semibratov  
ADDRESS: Celovška cesta 263  
POST CODE: 1000  
COUNTRY: SI

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the

so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Date: 09/15/2014 14:47:50  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the nuclear option, because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government

control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth.

Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Tomasine Bullard  
84 Commonwealth Ave Apt 01  
Boston, Massachusetts 02116

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth.

Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the Hands off the Net approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they

wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have "just enough Title II" any more than you can be "slightly pregnant."

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Clarissa Gardenhire

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job - providing more spectrum for wireless users or deregulating wireline telephone service - it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Van Swisher

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Samantha Daws

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading

their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

=====  
From: xxxx@xxxx.xxx  
Date: 09/15/2014 14:47:54  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear - investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that

is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Fa'jaun Fairrow  
3375 Mohican St  
Baton Rouge, LA 70805

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning,

would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Bobby Chang

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Crystal Scaramella

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC's attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal

would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
James Burnside  
1712 E Wildcat Ln  
Moses Lake, WA 98837

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Jerry Hall

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Terrika Baker

NAME: Michael Russitano

ADDRESS: 260 South Bouquet Street

POST CODE: 15213

COUNTRY: US

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx  
Date: 09/15/2014 14:47:58  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government

control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
David Andrade

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Jason Bryan

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC's attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn't need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
James Bickers

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC's attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government

control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said: "What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Joe Malaterra

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

It doesn't take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn't matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job

providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

=====  
From: Donald George  
Date: 09/15/2014 14:48:04  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The internet has become arguably the single most important public utility of all time. It permeates everything we do - banking, business, shopping, news, involvement in a wider social community, politics, health care, education, entertainment and on and on. It has to be a well regulated utility with absolutely equal access to all users.

If you allow any form of preferential access, the potential for abuse is huge. Political debate will be choked out. News will be manipulated and controlled. Large corporations will have an economic advantage which will shut down competition, innovation and economic development. Those who have much (and can afford priority access) will get even more; those who have little will lose what little they do have. The harm to our country, our economy and our citizens will be incalculable.

It is perfectly clear that if regulation allows for anyone to gain a personal or corporate advantage, they will do so. Just look at tax regulation and inversions, or personal taxes and carried interest loopholes, or stand your ground and gun violence, or voting rights and gerrymandered congressional districts, or any number of other issues. People and corporations will absolutely use any possible loophole to gain and keep power, influence and personal advantage. It happens all the time and it will happen to the internet if you allow it.

Please, please keep the internet absolutely 100% open with equal access to all users - big or small, wealthy or not, popular or unpopular, foreign or domestic. Anything less will destroy it. This has to start with good regulation and be followed up with good enforcement.

Donald George

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform

for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx

Date: 09/15/2014 14:48:05  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Archie Jackson

From: John McClain  
Date: 09/15/2014 14:48:05  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Chairman Wheeler,  
The FCC should assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. This legal argument offers the most protection for real net neutrality to prevent ISPs from controlling content speed and blocking websites. Without real net neutrality this country will move another step closer to total control by big business.

As a retired Naval officer, it grieves me to see the country I served and defended being changed to one "of the corporations, by the corporations, and for the corporations!"

Please use the power you have to defend the PEOPLE of this country, and despite what the Supreme Court puppets have declared, corporations are NOT people!!

John McClain

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Why should be interned, and the use thereof, be changed? It has always been equally available, so why should that change. Why should large corporations be able to control everything and put small businesses and private parties at a disadvantage? The obvious answer is GREED!  
Net neutrality should be available to everyone, all the time.

Roselene Haines

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$0.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman

forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

From: xxxx@xxxx.xxx  
Date: 09/15/2014 14:48:06  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear - investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Richard Wiese

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job - providing more spectrum for wireless users or deregulating wireline telephone service - it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change\200\224and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change\200\224and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in

the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Melissa Suchovsky

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA's draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Justin Shirk

From: Joanne Tatham  
Date: 09/15/2014 14:48:09  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

In the current cultural climate the balance between the middle class and the top 01% is outrageously tipped against the large majority of Americans and the Supreme Court has allowed corporations and the wealthy to essentially buy our elections. It seems absurd to give the corporations (who are NOT people) another bonus just because they can buy it at the expense of those who can't. This country was designed as a Democracy, remember?

Joanne Tatham

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said: "What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control." In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC's attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don't give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don't ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Raeann Huber

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job of providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

NAME: ??????

ADDRESS: ha50140011

POST CODE: ha50140011

COUNTRY: KR

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx  
Date: 09/15/2014 14:48:13  
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,  
Robert Witte  
1703 S Canyon Woods Ln

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC's sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the

future of internet freedom here in America.

Sincerely,  
Randee Stever

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the

highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Tonya Fowler  
Date: 09/15/2014 14:48:13  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job - providing more spectrum for wireless users or deregulating wireline telephone service - it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Tonya Fowler  
607 W Marigold Ave

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Bonita Parker

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

From: Joyelle Wiemer  
Date: 09/15/2014 14:48:14  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Please preserve net neutrality! The internet is definitively a public utility. The free exchange of ideas and information is a hallmark of American culture and it would be a tragedy to loose it to corporate greed and control. I use the internet many times a day. Sometimes it's for entertainment, but more often it's for information I need to function - from balancing my checkbook with online banking services, to researching better ways to help my daughter control her diabetes, to keeping an eye on the weather (and here in the Blue Ridge, that's critical in winter months). I will be extremely upset if corporations are allowed to interfere, control, or censure the information I can access. I really do believe net neutrality is vital to our way of life. Please protect it!

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people's representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Janel McDaniel McDaniel

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Arthur Brown  
Date: 09/15/2014 14:48:16  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Arthur Brown

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an independent agency, and it is no longer an expert agency. If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

From: Sandy Kelly  
Date: 09/15/2014 14:48:16  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit.

Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Sandy Kelly

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides.

Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Annie Pope  
Date: 09/15/2014 14:48:17  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government

control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth.

Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Annie Pope

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job - providing more spectrum for wireless users or deregulating wireline telephone service - it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

 Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an independent agency, and it is no longer an expert agency. If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

John Wasilewski  
15 Carlyle Dr  
Bayville, New Jersey 08721

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband

access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Douglas Waller

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

From: sean horan  
Date: 09/15/2014 14:48:19  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee's pledge to regulate the Internet lost their elections. That's right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administration and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

sean horan

The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the

highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless

of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

michase deronda  
336884 E Crestview Dr

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government's help, and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Reggie Batiste

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That's what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

theodore brewton  
1934 N Kenwood Ave  
San Bernardino, California 92404

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking,

a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our

communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=====

From: Lou Rabon  
Date: 09/15/2014 14:48:26  
Subject: Support for Net Neutrality

To the Commissioners of the FCC:

I am submitting comments to express my strong support for the open Internet. The FCC must institute rules that protect Internet openness and prevent a few powerful gatekeepers from stifling creativity, innovation, competition and free speech. The FCC should reclassify broadband Internet service under Title II.

Currently, the open Internet works like the phone lines. Consumers can call whomever they want; nobody gets to limit who they can call. Likewise, consumers choose where they want to go on the Internet; an Internet provider doesn't decide what content has preferential access or what is relegated to a slow lane.

But Internet service providers (ISPs) want that to change. They want the power to decide, depending on their priorities and who pays them the most, what websites and services get priority access to consumers. The weak rules they advocate for will put decision making and power over the Internet in their hands.

The Internet is too vital to the free exchange of ideas to allow the few companies who control delivery to edit the ideas and content that flow through it. Their ability to limit free speech is also bad economic policy. Economists across the political spectrum agree that when companies can construct barriers to entry, markets are not free and efficient. New competition is locked out, resulting in a form of monopoly that causes consumers to suffer from higher prices- like their cable bills- and fewer choices.

The open Internet has introduced new competition in news, information and entertainment. There are new buyers for what we as writers create. There are new and diverse content choices for consumers. These services have emerged outside of the traditional film and television business, where after decades of consolidation and mergers, seven corporations control 95% of television production and viewing. But

these new competitors are a threat to existing video providers, and the largest Internet providers, who are also the largest cable television providers, have an incentive to limit the growth of competing online video services.

The fate of the Internet is in the hands of the FCC. To prevent the Internet from becoming a controlled platform like cable television, the FCC must take strong action to prevent blocking, degrading or other forms of discrimination of lawful Internet traffic. The FCC must use its authority to reclassify broadband Internet access a telecommunications service under Title II of the Communications Act. Doing so is the only way to ensure the FCC can institute legally sound rules that preserve the open Internet by preventing ISPs from engaging in unjust and unreasonable behavior in their treatment of Internet traffic.

Without strong action, new competition will be unfairly locked out, innovation will be stifled, and the promise of the open Internet will remain unfulfilled. Please do not allow this to happen.

Sincerely,

Lou Rabon

Los Angeles, CA

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223  
ATTENTION FCC!!!

I'M GOING TO EXPRESS MY OPINIONS IN THE INTERNET, AND NOBODY HAS THE RIGHT TO STOP ME!  
Nobody is going to have control over what I say on the Internet! I'm going to express my opinions! I SUPPORT SCIENCE EDUCATION IN OUR PUBLIC SCHOOLS! I'm against any and all attempts by right wing Christian Fundamentalists to insert Creationism into science textbooks!

I'M GOING TO EXPRESS MY OPINIONS IN THE INTERNET, AND NOBODY HAS THE RIGHT TO STOP ME!  
GOD DAMN IT!!!

I HATE SPORTS! I HATE FOOTBALL! When I was in the fifth grade, my sports obsessed teacher refused to allow me to check out an Astronomy book from the school library! HE BASHED MY HEAD AGAINST THE CORNER OF A BRICK WALL!

I was reading at high school and adult level when I was only in the third grade! But some moron like Bill O'Riely on FOX NEWS makes MILLIONS OF DOLLARS every year, slobbering and drooling onto his microphone. Yeah! He once said, "the tides go in and the tides go out, and nobody can explain it" when Isaac Newton explained it 300 years ago!!!

When I was 17 years old, I was sexually molested by an older man! I WAS BEATEN AND RAPED! I'll be God damned if big corporations are going to control what I say on the internet! I WILL NOT BE SILENCED!!!

Religion is a lie! EVOLUTION IS A FACT! THE EARTH IS 04.05 BILLION YEARS OLD! THE UNIVERSE IS 13.08 BILLION YEARS OLD! EVOLUTION IS A FACT! GET OVER IT REPUBLICANS! I WILL NOT BE SILENCED ON THE INTERNET! I WILL NOT BE SILENCED ON THE INTERNET! I WILL NOT BE SILENCED ON THE INTERNET!

I don't want to see my favorite websites loading too slow, or seeing them shut down and removed because big Corporations and right-wing Republican Christard Funny-mentalists might not approve of their content!

I fear that my own web blog might be shut down because of content. I have posted SCIENCE articles on Astronomy, and articles debunking Creationism. My articles debunking religion are cynical and sarcastic. But, that is my right under the 1st Amendment. GOD DAMN IT!!!

If I lose my 1st Amendments rights, then I just might have to fall back on #02 to retrieve my #01!!! The big corporations are traitors to America and I charge them with TREASON!!! If I'm silenced on the Internet, then I will go out on my JAZZY power chair, with a battery powered bull horn, and I will go up and down the streets screaming into the night waking everybody up!

NO CENSORSHIP! NO CENSORSHIP! NO CENSORSHIP! NO CENSORSHIP! NO CENSORSHIP!

The big corporations should all be charged with TREASON, and if found guilty, they should get death by firing squad! No blind-fold and no last cigarette!!! BANG! BANG!

Now, I'm gonna have me a cigar!!!

I'm outta here!

Have a nice day!

Gerald St. Germaine

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it

in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

From: Randy Jarvis  
Date: 09/15/2014 14:48:30  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

To who it may concern;  
I'm asking you as a US citizen and a tax payer to STOP this docket now!! We depend on the internet as I'm disabled so I need it to do most of my shopping! As it gets harder to go into the stores for people like myself who are wheelchair bound we have to depend on our internet to get the things we need and must have!! Also we who run small businesses will basically be shut down since we're not a BIG & RICH company!! I urge you to vote this down and don't give into these BIG companies anymore than you already do now!!

Sincerely,  
Randy Jarvis

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

From: Patricia Carter  
Date: 09/15/2014 14:48:36  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Preserve Net Neutrality!

In order to preserve net neutrality, the FCC needs to ban Big Telecom from creating these so-called "fast-lanes" which only large companies could afford. Start-ups and independent sites like Daily Kos would be left behind and crushed.

Thank you

Patricia Carter

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$0.1 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new

entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

=====  
From: Steven Wiese  
Date: 09/15/2014 14:48:41  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Net neutrality has been the default state of the internet since its invention. Internet service providers load all websites at the same speed. Now, Big Telecom wants to change the rules so they can extract more money from websites by making them pay to be served to customers at faster speeds.

In order to preserve net neutrality, the FCC needs to ban Big Telecom from creating these so-called "fast-lanes" which only large companies could afford. Start-ups and independent sites like Daily Kos would be left behind and crushed.

The FCC has tried protecting net neutrality twice before, and been defeated by Big Telecom in court both times. In order to legally prevent Big Telecom from destroying net neutrality once again, the FCC should assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. This legal argument offers the most protection for real net neutrality to prevent ISPs from controlling content speed and blocking websites.

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Sharon Miears  
Date: 09/15/2014 14:48:42  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a public utility and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Sharon Miears  
14002 Ballantrae  
Gandview, Missouri 64030

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative

startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Dennis Newell

Date: 09/15/2014 14:48:43

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on

taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Dennis Newell  
131 Boston Rd  
Chelmsford, Massachusetts 01824

=====

From: James Williams

Date: 09/15/2014 14:48:43

Subject: Net Neutrality

Hello Chairman Tom Wheeler.

I am calling on you and the commission to reconsider the proposed rules that you claim will "protect" the open internet. Your proposal, under the guise of net neutrality, would instead authorize telecom companies to set up a "fast lane" for deep pocketed websites, while creating a "slow lane" for everyone else's websites. Basically, what you're proposing is payola, but with restrictions for "commercially unreasonable practices" and a rule against blocking lawful content.

The consequences of implementing such a ruleset would be disastrous for the infrastructure of the internet. As an example, most startups would not be able to get off the ground, as their lack of funding would put them at an overwhelming disadvantage over an established company who has deep enough pockets to bribe telecom companies to give it faster access, even if the startup is superior to the established company. Can you imagine if your rule was implemented 20 years ago? Companies like Google and Facebook exist today solely because of net neutrality. Had a payola rule existed in the 1990s, these companies would not have been able to get off the ground because their established, outdated competitors would've been paying the telecom companies off for faster service. In other words, it stifles innovation and only rewards more money to established companies.

Free speech would also be adversely affected. People use the internet as a powerful tool for political speech, and stories that would otherwise not get any attention from

mainstream media (e.g. Ferguson) can reach millions of viewers thanks to social media sites and independent blogs. These stories would never be heard under payola, as a news company like Fox could bribe telecom companies to slow access to those sites, effectively silencing them. Telecom companies could also use payola to slow access to the sites of politicians they don't like while speeding up those of politicians they favor. This can only be described as censorship and a blatant attack on the first amendment.

Another problem I see with the rules is the framework you're using to enforce them. The main reason the 2010 rules were thrown out by the courts was because you tried to enforce them using Section 706. The problem here is that, while the rules are less restrictive on telecom companies (since under S. 706, you have to allow payola), the restrictions on blocking and "commercially unreasonable practices" could still cause your rules to be brought to court, which given the authority you're using, would be unlikely to survive a court challenge.

Listen, Tom. There is only one way to actually preserve an open internet and stop telecom companies from turning the internet into cable TV on crack. You need to reclassify broadband as a common carrier under Title II. That way, you can set strong rules that would prevent discriminatory behavior from telecom companies. What you need to do afterward is put bans on blocking content, as well as a ban on paid prioritization (aka payola), then forbear from regulating the internet any further. This, my deluded friend, is the ONLY way to preserve net neutrality.

Now, I've heard tales from Republicans like Senator John McCain (R-Az) and Congressman Bob Latta (R-Oh) that deregulating telecom companies will lead to greater innovation and more jobs, while Title II will do the opposite. This is a lie. What they're preaching amounts to trickle down economics, and only serves to enrich those who are already rich.

This concludes my comment to the FCC. Have a nice day.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it

has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn't need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Theresa Regan

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Patrick Morrissey

Date: 09/15/2014 14:48:44

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear FCC:

As a US citizen, not only I, but each of you has a duty to protect, preserve and defend our nation, our people (that means all of us) from acts that would harm even the least among us.

Creating so-called "fast-lanes" and destroying net-neutrality is antithetical to what is each of your prime responsibility.

This is a country for all of us to be shared as equitably as possible not as doled out to the rich and powerful.

Do your job!!! For all the people, not just the rich and powerful!!!

Patrick Morrissey

COUNTRY: GB

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become

the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: James T. Stewart  
Date: 09/15/2014 14:48:48  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

FCC,

I am submitting this comment today because I believe very strongly in the first

amendment and  
feel that " net neutrality" is essential for the grass roots person. I believe  
that "net neutrality is  
directly related to insuring our first amendment rights.

We do not need "fast lanes " that would be based on our ability to pay, that would  
give large corporations an unfair advantage over the average person, access should be  
free to all, not based on your ability to pay.

Lastly, "Net Neutrality " is important because it assures that the " average  
Joe " has access to information.

James T. Stewart, Sr.

James T. Stewart

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be "slightly pregnant."

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim.

whether thatâ\200\231s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative

startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler,

I am an individual citizen from Idaho and use the Internet freely every day, without regulation. I do not want to imagine what abolishing this freedom of information would represent. I'm a big believer in free enterprise and over regulation normally costs money, puts controls on the free flow of information and many other unimagined long-term consequences. I am thankful every day for the break up of AT&T allowing free enterprise to reign in the communications sector.

Please do not break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt start-ups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the undeserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you have noted, Title II would not even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard

called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy!

Thank you,

Suzy Lloyd

NAME: François brazeau  
ADDRESS: 41 monseigneur rheaume est rouyn noranda  
POST CODE: J9x3j4  
COUNTRY: CA  
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless

of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Gary Wade

Date: 09/15/2014 14:48:59

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The Internet must remain freely available to all interests at the same speed. If FCC allows two or more tiers of service to be established, that will result in a few money interests able to assume control via speed-strangling sites with opinions to which they are opposed.

The fiction that "free market" is in any way a democratic function is now understood for what it is, a power grab and control by large corporations and private interests.

Gary Wade

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what

its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

From: Anna Katich  
Date: 09/15/2014 14:49:01  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

President Obama states it better than I can so here is what he says: "President Obama, August, 2014: "One of the issues around net neutrality is whether you are creating different rates or charges for different content providers. That's the big controversy here. So you have big, wealthy media companies who might be willing to pay more and also charge more for spectrum, more bandwidth on the Internet so they can stream movies faster. I personally, the position of my administration, as well as a lot of the companies here, is that you donâ\200\231t want to start getting a differentiation in how accessible the Internet is to different users. You want to leave it open so the next Google and the next Facebook can succeed."  
I agree completely with him!!

Thanks you,

Anna Katich

The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Charles Bucklin  
 ADDRESS: 733 Morgan hill rd ,new London  
 POST CODE: 03257  
 COUNTRY: US

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC's proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the

certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: John Krzyston  
Date: 09/15/2014 14:49:03  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners\200\223\200\223\200\223\200\223

Honorable Chairman Wheeler, keeping the internet free and accessible is a cornerstone of our freedom in the 21st century. Only those countries, like China and Russia, who do NOT cherish our freedom of speech ideals have restricted their areas and access of the internet for their people. The internet was created in the mid 1960's as a way for our Federal Government to communicate information and ideas FREELY with universities, I know this because one of my professors was directly involved with the project in Ann Arbor, Michigan. MTS (Michigan Terminal System) was an early iteration of this. Think of how our progress as a country and as a leader of freedom around the world might've been hampered if a private company restricted our government's or our universities' access use of this amazing resource! What if Canadian telecom company Rogers somehow got control of a portion of the U.S. internet and decided that people in the United States did not deserve high speeds reserved for Canadians? Restricting and allowing PRIVATE concerns to rule the internet will only stifle any future progress and free exchange of ideas in the United States and its citizens. It is up to you, sir, to fight for the people, not the national and multinational corporations of the United States of America. On this anniversary of the authoring of "The Star-Spangled Banner", please protect our unique "land of the free and home of the brave"!

Protect our internet from the would-be overlords of the hungry telecom companies. Thank you.

John Krzyston

From: Jackie Gilcrease  
Date: 09/15/2014 14:49:04  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of

unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Jackie Gilcrease  
323 N Washington St  
Cortez, Colorado 81321

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama's political agenda, then it is no longer an independent agency, and it is no longer an expert agency. If the FCC has merely become a political extension of Barack Obama's White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Mary Mayo

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it's only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of

unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

steven smith

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don't destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Timothy Small

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider's network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.
