COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

---
From: Larry Calloway  
Date: 09/15/2014 14:52:20  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners:

The proposed action to limit who has access to the internet is clearly a direct attack on Freedom of Speech in America. I believe most Americans now rely on the internet to get access objective news and information which is not provided by the "mainstream media".

Larry Calloway

From: Mary Gossman
Date: 09/15/2014 14:52:22
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

This comes down to a single principle, a FAIR playing ground for everyone not another opportunity for those who have the most money to push their products or agendas to the forefront. Individuals of all means and small independent companies should have the same access as companies that are behemoths or conglomerates. To remain a successful country, everyone needs to have equal access. A neighborhood bakery’s or outdoor equipment store’s website needs to be seen as readily as major players. Don’t make the internet into a Walmart that puts small businesses out of business because they can’t compete monetarily.

NAME: Beth Kulkarni  
ADDRESS: 87 S Warbler Bend Cir  
POST CODE: 77382  
COUNTRY: US  
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it
affords for innovation, economic development, communication, and democracy itself.

=======================================================================================

From: Gina Taliaferro
Date: 09/15/2014 14:52:23
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Chairman Wheeler,

I am writing to urge you and the FCC to preserve Net Neutrality and prevent corporations from gaining "priority" access to the internet. Inevitably, consumers will pay - financially in the form extra fees as we subsidize this access for the various service providers we utilize, and experientially as we get stuck in the slow lanes of the information superhighway we end up paying for. I am an artist, so I run the smallest of small businesses; unfettered access to the internet is key to my livelihood. As I'm already paying nearly more than I can afford to my ISP, I urge you to protect American citizens from being squeezed further.

Gina Taliaferro

=====================================================================

From: xxxx@xxxx.xxx
Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Nathan Fagerlie

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

It doesn’t take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn’t matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn’t the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC’s attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC’s rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Docket number: 14-28 protecting an open internet  

To Chairman Tom Wheeler and the FCC Commissioners:

Please keep the net neutral for all content. The best part of the internet is that it is open to everyone equally. Corporations already control our country, our politicians and our media. We need, no, we demand to have one open source for the people to freely and openly express themselves without the filter of corporations that pollute and bastardize every good idea.

From: xxxx@xxxx.xxx  
Date: 09/15/2014 14:52:26  
Subject: Stop Internet Regulation  

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn't need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Stephanie Saucedo

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people’s representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâand not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC’s sudden change of mind in the absence of
any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Lola Mckinnon

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Dear Chairman Wheeler, please don\200\231t break the Internet. Don\200\231t abandon the â\200\234Hands off the â\200\230Netâ\200\235 approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today\200\23s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II\200\231s draconian rules were designed in the 1930s for AT&T\200\231s government-created monopoly. They\200\231re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don\200\231t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today\200\231s bipartisan â\200\234Hands off the Netâ\200\235 approach. You can\200\231t have â\200\234just enough Title II â\200\235 any more than you can be â\200\234slightly pregnant.â\200\235

Title II would hurt startups most: they can\200\231t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC\200\231s powers over the Internet. Remember, you won\200\231t be Chairman forever, and the powers you claim over the Internet today could be used to control it
in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard’s digital mantra, too: First, do no harm. If you conclude that existing laws are adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that’s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the
so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx
Date: 09/15/2014 14:52:29
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn’t need to be governed.

Like many Americans, I believe that the internet should remain free of government
control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Eddie Gamez

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change\200\224and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn’t the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC’s attempt to place regulatory handcuffs on Internet providers \AT\202\224\200\234 just in case they might do something wrong someday. The FCC’s rulemaking in the absence of any actual problem, any actual
misbehavior on the part of Internet providers, or any consumer harm is beneath the
dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government
control and unnecessary regulation just as it has for the last twenty years of
unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the
future of internet freedom here in America.

Sincerely,

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC’s attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the “Hands off the Net” approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan approach. You can’t have “just enough Title II” any more than you can be “slightly pregnant.”

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what
its proponents demand: ban \200\234fast lanes.\200\235

We urge you to carefully focus regulation on real problems, what Chairman Kennard called \200\234vigilant restraint.\200\235 But remember Kennard\200\231s digital mantra, too: \200\234First, do no harm.\200\235 If you conclude that existing laws aren\200\231t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC\200\231s authority. No government agency should be trusted with a blank check to regulate the Internet at whim \200\224 whether that\200\231s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.
The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge
you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA’s draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Michael Daniels

you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee’s pledge to regulate the Internet lost their elections. That’s right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it’s only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government’s "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors.
and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change—a bad change—and not for the better.

The FCC’s attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation—just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it’s only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Preeti Khandelwal

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses
and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change—and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people’s representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Josh Ross

Dear Mr. Wheeler,
As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The ideological leader of the angry liberals calling for you to reduce the Internet to a public utility is Robert McChesney, the avowed Marxist founder of the socialist group Free Press. In an interview with SocialistProject.ca, McChesney said: “What we want to have in the U.S. and in every society is an Internet that is not private property, but a public utility...At the moment, the battle over network neutrality is not to completely eliminate the telephone and cable companies. We are not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control.” In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Marina Jones

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama’s political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama’s White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC’s attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the Hands off the Net approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband
networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan Hands off the Net approach. You can’t have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard’s digital mantra, too: First, do no harm. If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that’s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn’t the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC’s attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC’s rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Please pay attention to the millions of "average" Americans who want net neutrality and not the the big fat corporations who want to once again earn more money and buy whatever they want, however they want, because they DO have the money. I want total access, fast access and complete net neutrality. It’s the right thing to do.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn’t the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC’s attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC’s rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Emel Gulumoglu
383 Jervis Ave
Copiague, NY 11726
Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn’t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along and not for the better.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

It doesn’t take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn’t matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don’t give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don’t ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

From: xxxx@xxxx.xxx
Date: 09/15/2014 14:52:35
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ€”and not for the better.

The FCC’s attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ€”just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

John Stigall
474 S Main St Unit 108

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners,

Dear Chairman Wheeler,

I think you need to resign as Chairman of the FCC. It is obvious to me you have no intention of protecting internet neutrality, otherwise you would never even consider creating a slow lane and make accessing services more costly. This is such a diabolical, machiavellian scheme. I can barely afford internet service now and you want to make internet service more costly? You want to make internet service slower for millions of people? You have no business being the FCC Chairman. Please resign immediately.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting
toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Howard Burke
Date: 09/15/2014 14:52:38
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

As a public institution, you are charged with protecting the best interests of the people. Making the Internet a big money pay system and leaving the voting citizen on the side will inhibit the freedom we have come to enjoy and that still exists in the rest of the world.

I ask that you do your jobs and do your duty to the government of, by, and for the people.

Howard Burke

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless
of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: burnetta bradich  
Date: 09/15/2014 14:52:40  
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

It doesn’t take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn’t matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

burnetta bradich

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Sylvia Jones

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is the biggest economic, intellectual, and artistic success story of the century, and it rose up because of free people, not stifling government. The federal government needs to keep its hands off the Internet. It is not broken, and it does not need to be fixed. It is the federal government, not the Internet, that is broken, and in need of fixing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC’s dangerous new regulations, and protect the future of
internet freedom here in America.

Sincerely,

Jean-Guy Lemieux

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the Hands off the Net approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $0.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan Hands off the Net approach. You can’t have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard’s digital mantra, too: do no harm. If you conclude that existing laws are adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.
Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people’s representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Subject: reclassify ISPs as common carriers

Dear FCC and Chairman Wheeler,

I tendered my comments on the FCC proposal to allow fast lanes a few days ago through my affiliate with the Writers Guild of America. But I feel so strongly about the need for the FCC to reclassify ISPs as common carriers that I felt compelled to follow up with this second individual response.
I strongly feel the needs of the people would be best served by preserving the current system of an open and neutral internet, and ask the FCC to adopt whatever measures necessary to ensure that this open internet stays in place well into the future, even if it means reclassifying internet service providers as common carriers, a change that I think makes perfect sense.

Thanks for taking my thoughts into account.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet
currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don’t give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don’t ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Donald Raney

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I am the single mother of a high school senior, about to become a college student. Net neutrality is very important to both of us. I do not want any of the sites we use for information on the internet to be prioritized or slowed down. Many of my favorite sites are small-time players who cannot possibly compete with big Telecom companies in a pay to play scheme. I do not want these Big Companies as the gatekeepers of the flow of information through the internet.

Freedom of speech needs to be protected and truly free. Net neutrality is important to me and my family!

From: Nicole Wells
Date: 09/15/2014 14:52:43
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change—and not for the better.

Of the million or so comments the Federal Communications Commission received on its rule making, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear: investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present form.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

NAME: Rodrigo S. Cañibano
ADDRESS: Colonia alemana 1534, Neuquen, Neuquen, Argentina
POST CODE: 8300
COUNTRY: AR
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.
The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the Hands off the Net approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $1.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan Hands off the Net approach. You can’t have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban fast lanes. But remember Kennard’s digital mantra, too: First, do no harm. If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard’s digital mantra, too: First, do no harm. If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking,
a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

September 15, 2014

Chairman Wheeler,

The free flow of information on the WEB is a testament to the principle of free speech to one and all. Everyone benefits from this; education, commerce, entertainment. Please consider the merits of regulating as a public utility.

Paul Wahlstrom

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby
ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

ADDRESS: 549 Merchants ave
POST CODE: Rochester NY
COUNTRY: US
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby
ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: richard blake
Date: 09/15/2014 14:52:56
Subject: Docket number: 14-28 protecting an open internet
To Chairman Tom Wheeler and the FCC Commissioners

The educational, cultural, and economic opportunities presented by the internet MUST be AVAILABLE AND AFFORDABLE to ALL Americans, rather than being turned into just another source of profits for telecom giants which are already quite profitable thank you. In addition, the possibility of ideologically-based content censorship (by consignment to the "slow lane") is grossly anti-democratic and quasi-totalitarian.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the
essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the “Hands off the Net” approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan “Hands off the Net” approach. You
can’t have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard’s digital mantra, too: First, do no harm. If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

REF: 54105d1c1e0849000b59697d
Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change— and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC’s sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
David Milan

If the federal government goes through these plans to regulate the internet, I know that the internet will change—and not for the better.

The FCC’s attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation—just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change—and not for the better.

The internet cannot be governed as a public utility without being slowed by...
bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That’s what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!. 

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the
certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx
Date: 09/15/2014 14:53:03
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn’t need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Cindy Miles
206 Maple St
Three Oaks, MI 49128

From: Carolyn Dunn  
Date: 09/15/2014 14:53:04  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners:

Giving up net neutrality will cause many emails and websites to open so slowly that many people will not wait for the information that they want and need. It will be a disservice to websites particularly used for health considerations, education, and communicating about governmental and political elections and voting issues and policies that people need to read, view and experience to vote intelligently that have not been bought for by the rich with their limited economic agendas. Websites used by very young children and school age children, that the internet is necessary for them to explore and have their minds opened to many new subjects, cultures, areas and travel sites and communities that they might not see otherwise or experience - you will not know what is lost by not stimulating the mind of young people and also for those people would be classified as teen agers, middle age, and the elderly.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ€”not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Dustin Shapley  
924 N Quail  
Mesa, AZ 85205

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don’t destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Sharon Tosi

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform...
for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Millions of liberal fools demanding you reduce the Internet to a public utility don’t give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don’t ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Tyrone Wilson

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn’t need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change—and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could
improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation—just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future
The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.
In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee’s pledge to regulate the Internet lost their elections. That’s right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Barb Weipert

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new
regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC’s attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC’s rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Clara Hampton-lee

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC’s attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

If the federal government goes through these plans to regulate the internet, I know that the internet will change— and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people’s representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation—just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Leslie Biggs

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon
Hands off the Net approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan Hands off the Net approach. You can’t have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard’s digital mantra, too: First, do no harm. If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim, whether that’s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on
taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don’t destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it’s only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ€”and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on
Internet providers, shouldn't the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC's attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC's rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Sheina Caraballo
8509 Hare Ave
Jacksonville, FL 32211

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

It doesn't take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn't matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Loretta Meier

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear: investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama’s political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama’s White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet.
If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear FCC:

I want information, not corporate greed. I want equal access and control, not control by a few mega-corporations. I want a neutral internet - not Big Telecom. I depend on the internet for hundreds of things - from job search to medical information to clothes shopping, to communicating with friends - to political information. Leave the net neutral.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee’s pledge to regulate the Internet lost their elections. That’s right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Mike Clark

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change—and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it’s only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Cindy Kanitz
215 Spruce Pine Dr
Thomasville, GA 31757

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our
communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road, and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don’t destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama’s political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama’s White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Motty Fishtonaoster

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn’t the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable
outrage. Such is the case with the FCC’s attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC’s rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a “public utility” and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

It doesn’t take much to realize that this debate over net neutrality - or worse, turning the Internet into a public utility - is simply another attempt by the federal government to take control of another sector of the economy. Whether for power or tax revenue it doesn’t matter, stop trying to fix things that are not broken, and leave the American people and the Internet alone!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC’s attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC’s attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn’t the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC’s attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC’s rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Janet Countrman

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. From: Danielle Carr  
Date: 09/15/2014 14:53:18  
Subject: Preserve Women’s Voices by Protecting Net Neutrality

Dear FCC,

The proposed rules are a threat to Net neutrality

Currently, structural inequality in major media leaves women out. The internet is one of the few places where independent media can thrive, providing a place for all women to tell our stories in our own words. The proposed FCC rules for a misleadingly-named “open Internet” would not only threaten our free and easy access to these ways of making ourselves heard, by extension they would also give ISPs power to control and censor our speech online.

We use the web to organize and fight for change outside of it, but our access to the internet and the tools it offers is provided by big cable companies. We cannot allow for those we are fighting to become the very same people who have authority over the tools we use to fight.

Justice for women in its many forms is dependent on the ability to share information, ideas, and experiences freely. These proposed rules are a direct threat to my ability to be heard and to hear from the people I need to hear from. More importantly, they are a direct threat to women’s voices the world over. It is for these reasons that I strongly urge you not to pass these rules, and instead adopt rules and regulations that classify the Internet as a telecommunications service, which will preserve a truly open and equal internet for everyone.

Sincerely

Danielle Carr

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee’s pledge to regulate the Internet lost their elections. That’s right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.
Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Hans Brodesser

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn’t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along — no government intervention.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it’s only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

=======================================================================================

From: Dolores Guest
Date: 09/15/2014 14:53:19
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The idea that our access will be so limited unless we can pay for it is scary and upsetting. It is important that the internet be free from these sorts of limitations!

I am a researcher with collaborators world-wide. It is vital to my work and the scientific community that there be NO prioritizing, blocking or slowing down of access to information on the internet.

Net Neutrality is vital to maintaining liberty of ideas. Without it we risk content that is "pre-screened" or otherwise filtered by those with means. This cannot happen if we want to maintain a free-thinking society.

Dolores Guest

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COUNTRY: BR
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal
would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ€”200â€”and not for the better.
Reducing the Internet to a public utility is known on Wall Street as the "nuclear option," because it would devastate private investment with the force of an atomic bomb. And when private investment dries up, it’s only a matter of time before taxpayers will be forced to pick up the tab. Why would we possibly go down that path?

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulations just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Janice Boyd

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

=======================================================================================

From: Kate Ziegler
Date: 09/15/2014 14:53:20
Subject: Net Neutrality is Vital to Protect Women’s & Girls’ Voices Online

Already, major media’s structural inequality continually leaves women out. The internet is one of the few places where independent media can thrive, providing a place for all women to tell our stories in our words on our own terms, uncensored and controlled by no one. The proposed FCC rules for a misleadingly-named “open Internet” would not only threaten our free and easy access to these ways of making ourselves heard, by extension they would also give ISPs power to control and censor our speech -- my speech -- online.

And the threat is twofold: we use the web to organize and fight for change outside of it. The internet allows us to spread messages farther than our feet could take us, make ideas louder than our voices can shout, and stand together on the same ground though we are miles apart. But our access to the internet and the tools it offers is provided by big cable companies. In the fight for media justice, we are at risk of the very people we fight against having authority over the tools we use to fight them. Silencing dissenting voices will be easier than ever -- and legal -- under these proposed rules.

Justice for women in its many forms is dependent on the ability to share information, ideas, and experiences freely. These proposed rules are a direct threat to my ability to be heard and to hear from the people I need to hear from. More importantly, they are a direct threat to women’s voices the world over. It is for these reasons that I strongly urge you not to pass these rules, and instead adopt rules and regulations that classify the Internet as a telecommunications service, which will preserve a truly open and equal internet for everyone.

Kate Ziegler

Boston, MA 02130

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama’s political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama’s White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government
control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Barbara Brant
16390 Asheville Hwy
Campobello, SC 29322

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear: investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Laurence Andrews

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That’s what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the Hands off the Net approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $0.01 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan Hands off the Net approach. You
Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

From: xxxx@xxxx.xxx

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC’s attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Every infrastructure system in this country other than broadband Internet is decrepit. Water, sewer, power, road and bridges. All in a state of disrepair, dependent on taxpayers, and under the strict control of government regulators. Internet, on the other hand, is dynamic, innovative, and fueled by billions of dollars in private investment. Don’t destroy what works and turn it into just another slow-moving government-controlled mess.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Brian Lubenau

New Haven, CT 06513

From: Marion MacGillivray
Date: 09/15/2014 14:53:22
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Net neutrality has created the amazing media education/information/connection world expansion. We need to maintain service providers loading all websites at the same speed. Stop Big Telecom from changing the rules so they can extract more money from websites by making them pay to be served to customers at faster speeds.

In order to preserve net neutrality, the FCC needs to ban Big Telecom from creating these so-called fast-lanes which only large companies could afford. Start-ups and independent sites like Daily Kos would be left behind and crushed.

Our internet experience would drop into the pits in no time at all - please stop this from happening and leave the internet as it is.

Thanks,

Marion

Marion MacGillivray

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or Designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job of providing more spectrum for wireless users or deregulating wireline telephone service, it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Donna Walterscheid

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC’s attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Placing monopoly utility regulations on the competitive services of the Internet will send the crown jewel of the US economy into an economic tailspin. Instead of offering users new products and faster speeds, Internet providers will pour their energy into asking the federal government for permission to do anything from changing rates to using new technology. The Internet is not a monopoly. And it is not a utility. And the federal government should keep away from it and let it, and the Americans who use it, remain free of government control and coercion.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government’s "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The courts have twice struck down the FCC’s attempts to place the Internet under political control. If the FCC attempts this irresponsible action for the third time, Congress should cut off its funding, shut it down, and assign its legitimate responsibilities to other, more responsible agencies. The American people can and will defend ourselves against power-hungry bureaucrats like the IRS and the FCC.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

If the FCC is taking over the Internet to serve President Obama’s political agenda, then it is no longer an "independent agency," and it is no longer an "expert agency." If the FCC has merely become a political extension of Barack Obama’s White House, then it is in violation of the law that created it and it should be shut down. The Courts and the Congress have told the FCC that it is not authorized to regulate the Internet. If the FCC ignores the Courts and the Congress, it can and should suffer the consequences.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.
We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future. The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold
and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I own a small healthcare recruiting company. As a small business owner, I’m very concerned that I won’t be able to compete on the same level as the large companies who will be able to afford the "fast lane". The internet must be equally open to everyone. Giving the large, deep-pocketed businesses priority will ultimately kill small business innovation. Please keep the internet neutral! Thank you.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn’t need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Veronica Bojorquez

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA’s draconian rules have driven up electricity prices for millions of Americans. Now the FCC is considering massive new regulations on the Internet, and this power grab threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Ricardo Avila

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear: investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change@\200\224and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme
Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC’s sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx
Date: 09/15/2014 14:53:29
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change— and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear: investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the
future of internet freedom here in America.

Sincerely,
Drew Kjeldsen
17829 Sundial Dr
Noblesville, IN 46062

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC’s attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Merhawi Tafere

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet is the first step in regulating the people who use it. We are a free people, and the FCC needs to leave us alone. If the FCC regulates the Internet after Congress and the courts have told it not to, it will have proven itself to be an unaccountable agency, and the Congress should move to severely limit its powers and budget.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Jerome Carter

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the “Hands off the Net” approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $1.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan “Hands off the Net” approach. You can’t have “just enough Title II” any more than you can be “slightly pregnant.”

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban “fast lanes.”

We urge you to carefully focus regulation on real problems, what Chairman Kennard called “vigilant restraint.” But remember Kennard’s digital mantra, too: “First, do no harm.” If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

From: Erik Schnabel
Date: 09/15/2014 14:53:31
Subject: Protect Net Neutrality

I was deeply disappointed to hear that the Federal Communications Commission is planning on implementing rule changes that would allow Internet service providers to pay for special, faster lanes to deliver their content. In an environment where large corporations can pay for faster service, start-ups and every day Internet users won’t
be able to compete and we will lose the open, free-flowing exchange of information that has made the Internet so dynamic and integral to our lives.

The FCC can ensure it has the tools to act by reclassifying broadband as a telecommunications service. I urge you to reject the new rules and to take this vital and common sense step toward protecting net neutrality.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change— and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation—just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Subject: Stop Internet Regulation  

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn’t the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC’s attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC’s rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation
Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee’s pledge to regulate the Internet lost their elections. That’s right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Eric Rojas
505 Hilltop Dr

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I object to any action that would give those who flood the internet with unwanted spam at the expense if people who depend on it to maintain contact and get news. I prefer what e have now. It isn’t broken and doesn’t need fixing.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people’s representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

If the federal government goes through these plans to regulate the internet, I know that the internet will change— and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job—providing more spectrum for wireless users or deregulating wireline telephone service—it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation—just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet would be a job killer. All those who are employed as tech support, companies that make and deploy servers, routers, coax and fiber-optic cable will suffer job losses if the FCC chases billions of dollars of investments away by regulating Internet services as if they were a public utility. Every time Washington bureaucrats have grabbed massive new powers for themselves, they have created economic and human wreckage in their wake. Obamacare regulations on the healthcare system have cost millions of Americans their health insurance, and raised the cost of insurance and deductibles to millions more. Dodd-Frank financial regulations have shuttered smaller banks and dried up loans to small businesses that create jobs. And the EPA’s
draconian rules have driven up electricity prices for millions of Americans. Now the
FCC is considering massive new regulations on the Internet, and this power grab
threatens to cost the American people dearly as well.

Like many Americans, I believe that the internet should remain free of government
control and unnecessary regulation just as it has for the last twenty years of
unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new
regulations that would put federal bureaucrats in charge of internet freedom, and urge
you to stop these regulations before they’re enacted. If the federal government goes
through these plans to regulate the internet, I know that the internet will
change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the
Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme
Court that Internet services are unregulated information services, not a regulated
telephone service. And what events, or what new evidence does the FCC have to justify
this about-face? None whatsoever. The FCC’s sudden change of mind in the absence of
any real evidence or any clear problem is an arbitrary power grab, plain and simple to
any reasonable person. By taking such reckless actions to gain control over the
Internet, the FCC is ironically presenting a powerful argument that it has become
largely irrelevant in the present world of competitive data services. As Congress
reconsiders telecommunications in the coming years, it will no doubt consider what to
do with the very expensive, largely irrelevant, and power-hungry agency that the FCC
has sadly become.

Like many Americans, I believe that the internet should remain free of government
control and unnecessary regulation just as it has for the last twenty years of
unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the
future of internet freedom here in America.

Sincerely,
Angela Richardson

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear — investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the “Hands off the Net” approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment
and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan “Hands off the Net” approach. You can’t have “just enough Title II” any more than you can be “slightly pregnant.”

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban “fast lanes.”

We urge you to carefully focus regulation on real problems, what Chairman Kennard called “vigilant restraint.” But remember Kennard’s digital mantra, too: “First, do no harm.” If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that’s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Dear Chairman Wheeler:

COMMENT: Dear Chairman Wheeler:
We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC’s sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Donnie Jones

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should continue to exist in its present url.
Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation—just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

At every turn, the Congress and the Courts have told the Federal Communications Commission to cease and desist in its efforts to regulate the Internet. Rather than heed these warnings, the Commission is doubling down, threatening to place the most onerous regulations imaginable on the Internet, subjecting it to 1930s-style regulations meant for telephone monopolies. The Internet is not a monopoly or a public utility. The Internet is a massive network of networks that has arisen, not by government fiat, but through free, spontaneous arrangements by investors, engineers, businesses and the consumers they serve. The FCC should heed the sober warnings of the two branches of government that have instructed it to cease and desist in this reckless, destructive effort to regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Phillip Geran
2513 Newkirk Ave Apt 6g

From: Patrick Wolff
Date: 09/15/2014 14:53:38
Subject: Save the Open Internet! (GN Docket No. 14-28)

Sep 15, 2014

FCC Net Neutrality Comments

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us who can’t afford it will be relegated to second-tier, slow lane service. That action will harm the Internet’s roles in driving innovation in the modern economy and promoting small-d democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,

Patrick Wolff
North Hollywood, CA
Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

In the 2010 election, all 95 congressional candidates who signed Progressive Change Campaign Committee’s pledge to regulate the Internet lost their elections. That’s right, every single candidate who pledged to regulate the Internet was defeated by voters. In regulating the Internet, the FCC is clearly ignoring the will of the American people, the will of the Congress, and the judgment of the Courts. The dangerous legal waters this Administrations and the FCC are entering will end in a justifiable political backlash against those who overstepped their authority in an attempt to wield the powers of the federal government against those who they were sworn to serve. If the FCC places these extreme federal regulations on the Internet in the face of Congressional and judicial opposition, it will harm the Internet and devastate its own reputation.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Abelardo Ochoa

COMMENT: Dear Chairman Wheeler: We are writing to urge you to implement strong and unambiguous net neutrality rules
that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Save the Open Internet! (GN Docket No. 14-28)

Sep 15, 2014

FCC Net Neutrality Comments

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone
companies to establish fast lane service guarantees that the rest of us who can't afford it will be relegated to second-tier, slow lane service. That action will harm the Internet’s roles in driving innovation in the modern economy and promoting small-d democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,

N Jean Greenberg
Chicago, IL

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn’t the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC’s attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC’s rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That’s what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.  

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the “Hands off the Net” approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan “Hands off the Net” approach. You can’t have “just enough Title II any more than you can be slightly pregnant.” Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban “fast lanes.”

We urge you to carefully focus regulation on real problems, what Chairman Kennard called “vigilant restraint.” But remember Kennard’s digital...
First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim -- whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

From: xxxx@xxxx.xxx

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Americans have been getting faster and faster Internet speeds because of competition in the free economy, not because of anything the government has done. The Internet does not need the federal government’s "help," and neither the American people nor their elected representatives are asking for the federal government to place political controls over the Internet. The people calling for government control over the Internet are a tiny minority of far-left political activists, and the FCC knows it. Any effort by the FCC to regulate the Internet will be seen by the vast majority of the American people for what it is -- another lawless Obama Administration power grab.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Vicki Gregg
21 Riverside Ave
Haverstraw, NY 10927
As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Jim Pagano

Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the...
The so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC’s attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Ignacio Escobar

From: Lester Strong
Date: 09/15/2014 14:53:41
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chair Wheeler:

I want to register my support of what is called net neutrality. I have been a free lance writer for many years, and the Internet is crucial to my work. Speed on the Internet is also crucial to my work.

I do not want an Internet where some users are favored over others. In my estimation that’s like saying some people should have more access to the air we breathe than others.

In your considerations on the FCC, please help preserve open access to the Internet as it has existed since the Internet was placed into common use several decades ago.

Sincerely,
Lester Strong

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

A small fringe of the extremist left has been demanding a government takeover of the Internet for over ten years, but cannot point to any actual misbehavior that would justify such a takeover. When a government agency like the FCC follows such extremists, acting without evidence, and increasing its own power under imaginary or false pretenses, then the people’s representatives in Congress must cut off its funding and place its necessary duties in the hands of agencies that will act responsibly. All legislative powers reside in the Congress of the United States. The FCC knows full well that the 1996 Communications Act was a deregulatory bill. But in its zeal to ignore the letter and spirit of that law, and place severe regulations on the Internet, the FCC is usurping the legislative powers of the Congress by attempting to rewrite the laws passed by Congress. Such shocking disregard of the will of Congress will not stand.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,
As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Regulating the Internet has always been a solution in search of a problem. By trying for a third time to regulate the Internet, the FCC is demonstrating that it is no longer acting in the interests of the American people. Instead of doing its real job of providing more spectrum for wireless users or deregulating wireline telephone service it is trying to move backward in time to 1930s-era phone regulation. If the FCC drags 2014 technology back into 1930s regulations, the Internet will suffer, and so will the American people. Do not regulate the Internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Erickson Abadilla

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future. The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections. The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: xxxx@xxxx.xxx
Date: 09/15/2014 14:53:44
Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change—and not for the better.

The FCC’s attempts to regulate the Internet have a well-deserved losing record. Once again the FCC is moving to regulate the Internet to fix a nonexistent problem. The FCC has been given warnings by Congress and the Courts. If the FCC regulates the Internet, it will seriously degrade the Internet we have, and will delay or prevent the improvements in speed and services we have almost come to take for granted.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation—just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Dan Rascol

Subject: Save the Open Internet! (GN Docket No. 14-28)

Sep 15, 2014

FCC Net Neutrality Comments

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to
companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us who can't afford it will be relegated to second-tier, slow lane service. That action will harm the Internet’s roles in driving innovation in the modern economy and promoting small-d democratic ideas.

When I was younger, I was proud to be an American. Now I see our country becoming what ‘they’ used to tell us the communist countries were like. Censored news and information; restrictions on liberties; civil liberties always under assault; and a general sense of a police state. Our country can easily be described using these descriptions and quite frankly, I am damned tired of it!

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,

Douglas Williamson
Sherwood, OR

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ€²and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC’s sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ€²just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Mariajose Sais

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.
To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Want more awesome more often?
Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The Internet is not a "public utility" and never will be. America has led the world with competitive Internet services developed in a free market for information services. Competition has driven businesses to offer faster and better services. If the FCC regulates the Internet as if it were a public utility this competition will be diminished. Government controls will never be as beneficial as competition. Investors have fled regulated telecommunications services to invest in the unregulated sectors of the industry. Government regulation of Internet services would chase investment out of Internet service providers, and that would be disastrous for any and all who use the internet.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Robert Mueller
212 Heiser Rd
Fort Plain, NY 13339
Millions of liberal fools demanding you reduce the Internet to a public utility don’t give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don’t ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
William Quesenberry
248 Longridge Dr

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will
change and not for the better.

Regulating the Internet is the first step in regulating the people who use it. We are a free people, and the FCC needs to leave us alone. If the FCC regulates the Internet after Congress and the courts have told it not to, it will have proven itself to be an unaccountable agency, and the Congress should move to severely limit its powers and budget.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Jeffrey Bemiss
4439 Vista St
Philadelphia, PA 19136

NAME: Jack
ADDRESS: 260 Hampshire St
POST CODE: 02139
COUNTRY: US
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the
certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change\200\224and not for the better.
Millions of liberal fools demanding you reduce the Internet to a public utility don’t give that idea any actual merit. Many of these organizations are openly socialist and see destroying a major sector of the U.S. economy as a good thing in itself. Others are simply being swept up in sloganeering from comedians. And the same scare stories have been told for ten years that unless you regulate, big bad phone and cable companies will destroy the Internet. Never happened and never will, because of competition. But a powerful government regulator really could create mischief, and there would be no place else to turn. Don’t ruin a good thing.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Subject: Save the Open Internet! (GN Docket No. 14-28)

Sep 15, 2014
FCC Net Neutrality Comments

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us who can’t afford it will be relegated to second-tier, slow lane service. That action will harm the Internet’s roles in driving innovation in the modern economy and promoting small-d democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,
Heather Klawender

Portland, OR

====================================================================================================
Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the “Hands off the Net” approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan “Hands off the Net” approach. You can’t have “just enough Title II” any more than you can be “slightly pregnant.”

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban “fast lanes.”

We urge you to carefully focus regulation on real problems, what Chairman Kennard called “vigilant restraint.” But remember Kennard’s digital mantra, too: “First, do no harm.” If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that’s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

FCC Net Neutrality Comments  

Dear Net Neutrality Comments,  

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.  

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us who can’t afford it will be relegated to second-tier, slow lane service. That action will harm the Internet’s roles in driving innovation in the modern economy and promoting small-d democratic ideas.  

Please do not allow fast lanes and slow lanes on the Internet.  

Sincerely,  

Mary Lou Kopas  
Seattle, WA

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the Hands off the Net approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan approach. You can’t have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t allow the FCC to do what its proponents demand: ban fast lanes. We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard’s digital mantra, too: First, do no harm. If you conclude that existing laws are inadequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether Title II or the vast powers the FCC has claimed under Section
706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.
The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Bremen, IN 46506

September 15, 2014

Dear Tom Wheeler,

The internet has experienced unfettered growth and contributed to unprecedented advancements in technology largely because of the current "hands off" regulatory approach. That is why I am writing to express my opposition to the so-called "net neutrality" rule, which would replace the relative freedom of today's internet with new, heavy-handed federal regulations.

Imposing "net neutrality" and Title II regulations will only create an atmosphere that creates more government-imposed barriers to broadband investment and innovation. These misguided rules will also make it harder for startups to enter the market and slow broadband deployment. Moreover, these proposed regulations will give the federal bureaucracy unparalleled and unprecedented power over the Internet.

In short, these proposed "net neutrality" rules will be bad for competition, bad for consumers, and harm America's digital economy.

I urge you to leave the internet alone and say no to Title II and so-called "net neutrality."
Thank you for your time.

Sincerely,
Melonia Russell

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold

and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don\201t break the Internet. Don\201t abandon the â\201Hands off the Netâ\201s approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today\201s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II\201s draconian rules were designed in the 1930s for AT\&T\201s government-created monopoly. They\201re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don\201t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today\201s bipartisan â\201Hands off the Netâ\201s approach. You can\201t have â\201slightly pregnant.â\201

Title II would hurt startups most: they can\201t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC\201s powers over the Internet. Remember, you won\201t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don\201t intend.

Yet, as you\201ve noted, Title II wouldn\201t even allow the FCC to do what its proponents demand: ban â\201fast lanes.â\201

We urge you to carefully focus regulation on real problems, what Chairman Kennard called â\201vigilant restraint.â\201 But remember Kennardâ\201s digital
First, do no harm. If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

FCC Net Neutrality Comments

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us who can’t afford it will be relegated to second-tier, slow lane service. That action will harm the Internet’s roles in driving innovation in the modern economy and promoting small-d democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

If net neutrality is compromised, only the big telecoms benefit, while much the remaining world suffers for lack of access.

Sincerely,

Bruce Schacht
Portland, OR

FCC Net Neutrality Comments

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us who can’t afford it will be relegated to second-tier, slow lane service. That action will harm the Internet’s roles in driving innovation in the modern economy and promoting small-d democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,
Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold
and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=======================================================================================

From: Carolyn Blackmore
Date: 09/15/2014 14:54:01
Subject: Save the Open Internet (GN Docket No. 14-28)

Sep 15, 2014

FCC Net Neutrality Comments

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us who can’t afford it will be relegated to second-tier, slow lane service. That action will harm the Internet’s roles in driving innovation in the modern economy and promoting small-d democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,

Carolyn Blackmore

Estacada, OR
Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

From: Phillip Vaclavik
Date: 09/15/2014 14:54:01
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I’m handicapped gent and the internet is my gateway to the outside world. I can order gifts for my friends and family, read newspapers and magazines from all over the country and stay current with national and international news and events. Denying me free access will have the Big Telecom deciding for me what I will read, how I will interact and communicate with my friends and family, where I purchase, then track that information and sell it to highest bidder. I may be a train wreck physically but my mind is very sharp.

I have contacted my congressman and both senators and President Obama stating my displeasure with this. It’s damn joke!!!

Phillip Vaclavik

Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our
communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. From: Brian Porter
Date: 09/15/2014 14:54:02
Subject: Save the Open Internet! (GN Docket No. 14-28)

Sep 15, 2014

FCC Net Neutrality Comments

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us
who can't afford it will be relegated to second-tier, slow lane service. That action will harm the Internet’s roles in driving innovation in the modern economy and promoting small-d democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,

Brian Porter

Madison, WI

The FCC must act in a clear and decisive way to ensure the Internet does not become
the bastion of powerful incumbents and carriers, but rather remains a place where all
speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access
to the Internet under a Title II framework, with appropriate forbearance, thereby
ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform
for social, political, and economic life, the FCC must adopt a rule against blocking,
a bright-line rule against application-specific discrimination, and a rule banning
access fees. These principles of fairness and openness should not only apply to the
so-called last-mile network, but also at points of interconnection to the broadband
access provider’s network. Likewise, strong net neutrality rules must apply regardless
of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the “Hands off the Net” approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They are a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we
trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan “Hands off the Net” approach. You can’t have “just enough Title II” any more than you can be “slightly pregnant.”

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban “fast lanes.”

We urge you to carefully focus regulation on real problems, what Chairman Kennard called “vigilant restraint.” But remember Kennard’s digital mantra, too: “First, do no harm.” If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that’s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

levels. So many bills over the decades have been stuffed with their self serving interests (invisible to the regular taxpayer) that is almost beyond control or beyond the hope of ever reversing the trend. They’ve buried their self serving interests for years in a myriad of detailed legislation designed to enrich their power & wealth while further delineating the basic needs, rights & protections of everyday citizens. If we were a European republic, we’d have long ago reached the boiling point and a full scale revolution would have resulted. The political system would have been overhauled and some sense of fair play would have replaced it. No doubt there would be bumps in the road along the way but citizens would have had enough and taken action into their hands to reform a broken system. The rich & powerful, the government leaches & career politicians would have been run out of office and a new establishment formed to reform & replace this broken down & corrupt system. This former US Air Force officer & patriot is sick & tired of the bullying and manipulation of Washington & the rich ^ powerful. Enough is enough! Keep the internet open & free. It is one of few forms of expression where regular citizens can communicate, share ideas & information in a non-regulated forum and allow a free flow of opinions & more without Big Brother interfering.

From: Brandy Schumacher
Date: 09/15/2014 14:54:09
Subject: Save the Open Internet! (GN Docket No. 14-28)

Sep 15, 2014

FCC Net Neutrality Comments
Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us who can’t afford it will be relegated to second-tier, slow lane service. That action will harm the Internet’s roles in driving innovation in the modern economy and promoting small-d democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,

Brandy Schumacher

Citrus Heights, CA

COUNTRY: US

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Save the Open Internet! (GN Docket No. 14-28)

Sep 15, 2014  
FCC Net Neutrality Comments  

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread.

Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us who can't afford it will be relegated to second-tier, slow lane service. That action will harm the Internet’s roles in driving innovation in the modern economy and promoting small-D democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,

Daniel Oldman
Durham, NC

From: Donna Stahl  
Date: 09/15/2014 14:54:11  
Subject: Docket number: 14-28 protecting an open internet
To Chairman Tom Wheeler and the FCC Commissioners

The Internet must retain its net neutrality. If you pass a new rule creating different lanes of communication, you will create classes of internet users -- the "haves" and "have-nots," dependent on finances. Communication must be neutral in order for all to be treated equally.

Please protect an open internet by treating it like a public utility under the law.

Donna Stahl

From: Kathleen Normand
Date: 09/15/2014 14:54:11
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The Internet has always been neutral - small, medium, and large entities enjoy the same access today. It’s an atmosphere where everyone can be heard, and have a chance to make a reasonable living if they so choose. It’s fertile ground for start-ups (how many of today’s BIG internet sites were a thing 10-15 years ago?). It’s a level playing field. Allowing big telecom/cable providers to give priority to the highest bidder is not only unfair, but it’s downright un-American as well.

As things are today, I can pick and choose what I want to see on the Internet. I choose my own content. If my Internet provider is able to favor some websites/data over others, this really inhibits my ability to choose my content. This should never happen!

Please don’t break the Internet. We depend upon it for so much in our lives! I personally make a living partially from Internet income. If the Internet becomes two-tiered, I will probably suffer for it financially, as will thousands of others. In these days of a tough economy, it’s not right to give big corporations huge advantages while making the "little guy" suffer...

There is a way out that would be fair for everyone. Please use the legal authority you already have through Title II authority of the Telecommunications Act so the Internet is treated like the public utility it is. Times have changed and the Internet is no longer a novelty - it is vital to individuals of all segments of society along with all sizes of business. It is TRULY a public utility, just as much as phones have been for years.

Please, don’t break the Internet by allowing a two-tiered system. The only ones who will gain from this are big corporations, and this will be at the expense of everyone. Please treat the Internet as it should be - as a public utility.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules
that protect the Internet from discrimination and other practices that will impede its
ability to serve our democracy, empower consumers, and fuel economic growth. Erecting
toll booths or designating fast lanes on the information superhighway would stifle
free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become
the bastion of powerful incumbents and carriers, but rather remains a place where all
speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access
to the Internet under a Title II framework, with appropriate forbearance, thereby
ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform
for social, political, and economic life, the FCC must adopt a rule against blocking,
a bright-line rule against application-specific discrimination, and a rule banning
access fees. These principles of fairness and openness should not only apply to the
so-called last-mile network, but also at points of interconnection to the broadband
access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Steve Ebert
Date: 09/15/2014 14:54:11
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler,

I have grave concerns, that the ability to get information from the internet that I WANT would be held hostage by the Internet Service providers. Keep the internet neutral. Everyone should have the same access. Thank you for your consideration.

Steve Ebert

NAME: Troy Hojel
ADDRESS: 5100 Bottlebrush Run
POST CODE: Broomfield CO 80023
COUNTRY: US
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

COUNTRY: US
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides.

Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it
affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the “Hands off the Net” approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $1.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan “Hands off the Net” approach. You can’t have “just enough Title II” any more than you can be “slightly pregnant.”

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban “fast lanes.”

We urge you to carefully focus regulation on real problems, what Chairman Kennard called “vigilant restraint.” But remember Kennard’s digital mantra, too: “First, do no harm.” If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

From: David Fracht  
Date: 09/15/2014 14:54:16  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners\200\223\200\223\200\223\200\223\200\223

Please keep the internet neutral with no special interests or price tiers having precedence over any others. The internet has worked well under this model since it began....to make changes which would benefit large providers at the expense of average
users is unacceptable!

David Fracht

NAME: Anita Sundfær

ADDRESS: Holmsveet 60

POST CODE: 7654

COUNTRY: NO

COMMENT: Dear Chairman Wheeler:
We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Carole Noblitt
Date: 09/15/2014 14:54:20
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

[200\223\200\223\200\223\200\223\200\223]
As a (very) small business owner and consumer, I am very concerned that the big telecommunications corporations will be allowed to gain control of our access to the internet. The guys with the most money will be able to direct everything. This is also a First Amendment concern. The FCC is charged with protecting the ordinary consumer. Regulate these guys as utilities and keep the internet free and fast. Thank you!

Carole Noblitt

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.
When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

======================================================================

From: Wendy Mulhern
Date: 09/15/2014 14:54:20
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

It is imperative that we maintain net neutrality. This will enable us to have free enterprise in the future (where start up companies can compete with established ones.) This will enable us to be informed about what’s really happening in the world (instead of having corporations block the people’s protests through their ownership of the news media, a thing they have already done with TV and print news). Corporations were originally set up to serve the greater good, but for many decades, they have not done so. Greater good would be recognized in shared opportunities for profit, for enterprise, for information. Not in being fed more of the same mindless so-called entertainment that has poisoned television. The internet is not a commodity to be sold to the highest bidder. It belongs to the people, like air and water.

I depend on the internet as an author, a poet, and a publisher. I need to be able to share my work with others, without having it be blocked.
Please don't allow the telecom companies to establish fast lanes which I would not be able to afford.

Wendy Mulhern

From: Larry Campbell
Date: 09/15/2014 14:54:23
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Larry Campbell
7923 guerad dr, n
Jaxsonville, Florida 32210
From: Ralph Reed  
Date: 09/15/2014 14:54:23  
Subject: Docket number: 14-28 protecting an open internet  

To Chairman Tom Wheeler and the FCC Commissioners:

Look the economy of the internet is based on innovation. It has generated billions of dollars in value and tax revenue. The fair accessibility to internet resources is the reason for that.

Without Net Neutrality, that is fundamentally at risk and will be exploited by ISPs to strong arm consumers and content providers while adding no real value beyond what they are currently adding.

It’s extortion of that masses... your constituents... that makes everyone I know sick to their stomachs.

Please fight for an Open Internet and a return to the Net Neutrality that made the US and internet leader.

Thanks for your time and consideration.

Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Subject: Save the Open Internet! (GN Docket No. 14-28)

Sep 15, 2014  
FCC Net Neutrality Comments  

Dear Net Neutrality Comments,

The Internet has succeeded because it has always been open: open to companies, no matter how small, with new innovations and open to those speakers with new ideas and viewpoints, no matter how widespread. Eliminating the principle of net neutrality, which guarantees an open Internet, by granting authority to the powerful cable and telephone companies to establish fast lane service guarantees that the rest of us who can’t afford it will be relegated to second-tier, slow lane service. That action will harm the Internet’s roles in driving innovation in the modern economy and promoting small-d democratic ideas.

Please do not allow fast lanes and slow lanes on the Internet.

Sincerely,

Emily Reid  
Amherst, MA

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the “Hands off the Net” approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan “Hands off the Net” approach. You can’t have Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new...
entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC\'s powers over the Internet. Remember, you won\'t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don\'t intend.

Yet, as you\'ve noted, Title II wouldn\'t even allow the FCC to do what its proponents demand: ban \"fast lanes.\" We urge you to carefully focus regulation on real problems, what Chairman Kennard called \"vigilant restraint.\" But remember Kennard\'s digital mantra, too: \"First, do no harm.\" If you conclude that existing laws aren\'t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC\'s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

NAME: Yumekko Cillia
ADDRESS: Wielmoza 79
POST CODE: 32-045 Suloszowa
COUNTRY: PL
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Bob Chalich
Date: 09/15/2014 14:54:27
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners:

Dear FCC...

as the watchdog for communications in the United States you simply must not allow big telecom to control speeds on the Internet. There must be 01 Highway for everyone and that highway must be affordable to those of us who do not have millions of dollars to spend on internet speeds. please do not allow big telecom to control the greatest tool in the 20th and 21st centuries.

Bob Chalich
Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Eric Ratcliffe
ADDRESS: 114 Thornhill Dr
POST CODE: 31525
COUNTRY: US
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.
When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the
so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

NAME: Ashley
We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Arthur Kilmurray  
Date: 09/15/2014 14:54:36  
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The internet must remain neutral. Every citizen should have equal access, equal speed of information. The internet is the modern version of the public library. Should big monied interests control what and when people can access in the libraries? Hell no! Same with the internet. Do your job Mr. FCC.

Arthur Kilmurray

Dear Chairman Wheeler, please don\’t break the Internet. Don\’t abandon the \’Hands off the Net\’ approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today\’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II\’s draconian rules were designed in the 1930s for AT&T\’s government-created monopoly. They\’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don\’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today\’s bipartisan \’Hands off the Net\’ approach. You can\’t have \’just enough Title II\’ any more than you can be \’slightly pregnant.\’
Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban ‘fast lanes.’

We urge you to carefully focus regulation on real problems, what Chairman Kennard called ‘vigilant restraint.’ But remember Kennard’s digital mantra, too: ‘First, do no harm.’ If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

COUNTRY: US
COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the
essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

To Chairman Tom Wheeler and the FCC Commissioners

No Content Found -- Please specify some content

The FCC is not an employee of Big Cable; it is a public servant/service agency. The public and our Democracy want and deserve open communication so that no group can dictate what is "factual." Contrary evidence/opinion and new ideas demand a neutral media outlet of some kind - NET NEUTRALITY must be protected.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

=======================================================================================

From: Dale Hartlieb
Date: 09/15/2014 14:54:42
Subject: Docket number: 14-28 protecting an open internet
To Chairman Tom Wheeler and the FCC Commissioners:

Net Neutrality must be preserved for two major reasons:
1. Independent voices typically originate from sources that do not have major financial backing and therefore those voices will be stifled by the inability to buy the proposed high speed transfer.
2. The proposed ‘Fast Lane’ will be filled with high value information that will make it a prime target for illicit surveillance and hacking.

Please consider marshaling all efforts to preserve net neutrality and resist the highly financially backed corporate interests. Thank you.

Dale Hartlieb

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the ‘Hands off the Net’ approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan ‘Hands off the Net’ approach. You can’t have ‘just enough Title II’ any more than you can be ‘slightly pregnant’.

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban ‘fast lanes’.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called ‘vigilant restraint’. But remember Kennard’s digital mantra, too: ‘First, do no harm’. If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim.
whether that’s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining
moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Jennifer Gee
Date: 09/15/2014 14:54:43
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear FCC Chairman,

I am very concerned about keeping net neutrality. Equal access to the internet, regardless of how much money a business has is critical. Please don't allow internet speed be something that can be "bought." America already has enough inequality and this seems to be stacked against small businesses, entrepreneurs, and folks like students.

Please don't stack the decks in favor of large companies just so that telecom companies can make more money. This is inherently un-American.

From: Mark Wahl
Date: 09/15/2014 14:54:44
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler,
There is no other path but to allow the reclassification of network carriers as a public utility so the FCC can assert authority it already has under Title II of the Telecommunications Act of 1934. Given the almost universal use of the internet and its essentiality (certainly as essential and fundamental as the telephone) it needs to be governed with rules just like a utility, not like a corporate profit-gimick-ridden casino game. Please leave a legacy of universal information and interaction by taking this fairly obvious step before the net gets sealed up by corporate game-players and high rollers, as inevitably it will without uncompromising parameters set at this stage.

Mark Wahl

Dear Chairman Wheeler, please donâ€™t break the Internet. Donâ€™t abandon the â€œHands off the Netâ€ approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built todayâ€™s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title IIâ€™s draconian rules were designed in the 1930s for AT&Tâ€™s government-created monopoly. Theyâ€™re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We donâ€™t have claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling todayâ€™s bipartisan â€œHands off the Netâ€ approach. You canâ€™t have â€œjust enough Title IIâ€ any more than you can be â€œslightly pregnant.â€

Title II would hurt startups most: they canâ€™t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCCâ€™s powers over the Internet. Remember, you wonâ€™t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you donâ€™t intend.

Yet, as youâ€™ve noted, Title II wouldnâ€™t even allow the FCC to do what its proponents demand: ban â€œfast lanes.â€

We urge you to carefully focus regulation on real problems, what Chairman Kennard called â€œvigilant restraint.â€ But remember Kennardâ€™s digital mantra, too: â€œFirst, do no harm.â€ If you conclude that existing laws arenâ€™t adequate to protect consumers, you should ask Congress for legislation.
that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.
To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules
that protect the Internet from discrimination and other practices that will impede its
ability to serve our democracy, empower consumers, and fuel economic growth. Erecting
toll booths or designating fast lanes on the information superhighway would stifle
free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become
the bastion of powerful incumbents and carriers, but rather remains a place where all
speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access
to the Internet under a Title II framework, with appropriate forbearance, thereby
ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform
for social, political, and economic life, the FCC must adopt a rule against blocking,
a bright-line rule against application-specific discrimination, and a rule banning
access fees. These principles of fairness and openness should not only apply to the
so-called last-mile network, but also at points of interconnection to the broadband
access provider’s network. Likewise, strong net neutrality rules must apply regardless
of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

From: Gregory McCracken  
Date: 09/15/2014 14:54:49  
Subject: Do Not Regulate the Internet  

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Since the internet became an everyday usable resource to people all over the world, it has grown and expanded in every way. People have been able to use it to express creativity, build businesses, share media, and even connect with people they would have never gotten an opportunity to meet otherwise. The notion that the internet is broken and needs repair is simply not true. The internet is alive, vibrant and growing. Stop trying to govern what doesn’t need to be governed.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of
unprecedented growth.

Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Gregory McCracken
3564 State Hwy. 146 So.
Livingston, Texas 77351

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking,
a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the Hands off the Net approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s broadband networks.
government-created monopoly. They're a poor fit for the Internet. FCC Chairmen
Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they
wisely drew a clear, bright line between Title II and the Internet. We don't buy
claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we
trust that the FCC can quickly whittle Title II into something resembling
today's bipartisan Hands off the Net approach. You can't have just enough Title II
any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily
as big companies. Title II would protect incumbent broadband companies from new
entrants like Google Fiber. Title II would hurt the underserved by slowing deployment
and upgrades in minority and rural communities. And Title II would vastly increase the
FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what
its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard
called vigilant restraint. But remember Kennard's digital mantra, too:
First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition.
Instead of imposing Title II, we urge you to identify regulatory barriers at all
levels of government that could be removed to help existing companies keep upgrading
their networks, but also help Google Fiber, wireless providers and other private
companies to compete.

Competition, not endless litigation and political bickering over Title II, should be
your legacy.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes
through these plans to regulate the internet, I know that the internet will change and not for the better.

The American people are watching a Federal Communications Commission (FCC) that is not seeking to make the Internet better, but instead seeking to regulate it. The FCC could improve broadband delivery by auctioning off much-needed spectrum. Or it could get rid of some of its own burdensome rules that prevent companies from attracting investors and innovating. But instead of doing these things that would improve the Internet, the FCC is wasting its time in an obsessive drive to regulate. This tells the American people that once again, a Washington agency is working in a self-interested way to increase its own power at the expense of the free people it is meant to serve.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
London Holmes

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Before our government can handcuff a citizen, it must have some reasonable evidence that they have done something wrong. Before the FCC places regulatory handcuffs on Internet providers, shouldn’t the government present evidence that they have actually done something wrong? If the police were to handcuff someone because they might, theoretically, maybe, kind of do something wrong someday, there would be justifiable outrage. Such is the case with the FCC’s attempt to place regulatory handcuffs on Internet providers just in case they might do something wrong someday. The FCC’s rulemaking in the absence of any actual problem, any actual misbehavior on the part of Internet providers, or any consumer harm is beneath the dignity of an expert agency.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Angie Rans
Po Box 623
North Liberty, IN 46554
not at that point yet. But the ultimate goal is to get rid of the media capitalists in the phone and cable companies and to divest them from control. In a country of over 300 million people, even an extremist like McChesney can find, perhaps, millions of followers. But you should know better than to listen to them.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth.

Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Cyclic Lednek

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

The FCC is considering monopoly utility regulations on the Internet, even though the Internet is not a monopoly or a utility. The FCC itself argued before the US Supreme Court that Internet services are unregulated information services, not a regulated telephone service. And what events, or what new evidence does the FCC have to justify this about-face? None whatsoever. The FCC’s sudden change of mind in the absence of any real evidence or any clear problem is an arbitrary power grab, plain and simple to any reasonable person. By taking such reckless actions to gain control over the Internet, the FCC is ironically presenting a powerful argument that it has become largely irrelevant in the present world of competitive data services. As Congress reconsiders telecommunications in the coming years, it will no doubt consider what to do with the very expensive, largely irrelevant, and power-hungry agency that the FCC has sadly become.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Melodie Curry

The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square.

The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining
moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

COMMENT: Dear Chairman Wheeler:

We are writing to urge you to implement strong and unambiguous net neutrality rules that protect the Internet from discrimination and other practices that will impede its ability to serve our democracy, empower consumers, and fuel economic growth. Erecting toll booths or designating fast lanes on the information superhighway would stifle free speech, limit consumer choice, and thwart innovation.

The FCC must act in a clear and decisive way to ensure the Internet does not become the bastion of powerful incumbents and carriers, but rather remains a place where all speakers, creators, and innovators can harness its power now and in the future.

The Internet is a staple of our lives and our economy. The FCC should protect access to the Internet under a Title II framework, with appropriate forbearance, thereby ensuring greater regulatory and market certainty for users and broadband providers.

To ensure that the Internet fulfills its promise of being a powerful, open platform for social, political, and economic life, the FCC must adopt a rule against blocking, a bright-line rule against application-specific discrimination, and a rule banning access fees. These principles of fairness and openness should not only apply to the so-called last-mile network, but also at points of interconnection to the broadband
access provider’s network. Likewise, strong net neutrality rules must apply regardless of whether users access the Internet on fixed or mobile connections.

The FCC’s proposed rules would be a significant departure from how the Internet currently works, limiting the economic and expressive opportunity it provides. Investors, entrepreneurs, and employees have invested in businesses based on the certainty of a level playing field and equal-opportunity marketplace. The proposal would threaten those investments and undermine the necessary certainty that businesses and investors need going forward. The current proposed rules, albeit well-meaning, would be far-reaching. Erecting new barriers to entry would result in fewer innovative startups, fewer micro-entrepreneurs, and fewer diverse voices in the public square. The FCC should abandon its current proposal and adopt a simple rule that reflects the essential values of our free markets, our participatory democracy, and our communications laws.

When the history of the Internet is written, 2014 will be remembered as a defining moment. This FCC will be remembered either for handing the Internet over to the highest bidders or for ensuring that the conditions of Internet openness remain for the next generation of American entrepreneurs and citizens. We urge you to take bold and unequivocal action that will protect the open Internet and the opportunity it affords for innovation, economic development, communication, and democracy itself.

Dear Chairman Wheeler, please don’t break the Internet. Don’t abandon the ‘Hands off the Net’ approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the $01.03 trillion dollars of private investment that built today’s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II’s draconian rules were designed in the 1930s for AT&T’s government-created monopoly. They’re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don’t
buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today’s bipartisan Hands off the Net approach. You can’t have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can’t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC’s powers over the Internet. Remember, you won’t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don’t intend.

Yet, as you’ve noted, Title II wouldn’t even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard’s digital mantra, too: First, do no harm. If you conclude that existing laws aren’t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC’s authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Stop Internet Regulation

Dear Mr. Wheeler,

As an American citizen, I wanted to voice my opposition to the FCC’s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they’re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better.

Of the million or so comments the Federal Communications Commission received on its rulemaking, did any make an evidence-based case that the Internet is not free, open, and functioning well? Evidence matters. And there simply is no evidence to back up the dire claims of disaster if the Internet is left unregulated. The unregulated Internet is probably the greatest success story of the century. The body of evidence is very clear: investment and innovation aimed at winning customers is the most powerful force for good when it comes to developing the Internet. Tens of billions of private dollars pour into its networks every year, even in a bad economy. The only reason to change this is to appease a small left-wing political faction that is ideologically obsessed with government control over the economy. If the FCC has descended to the depths where it ignores evidence so it can appease an ignorant, angry left-wing political faction, then it is time to consider whether the agency should
continue to exist in its present url.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,
Richard Thomas

If the federal government goes through these plans to regulate the internet, I know that the internet will change—and not for the better.

The internet cannot be governed as a public utility without being slowed by bureaucratic inertia. We are a country built on principles of free people and free markets, and nothing epitomizes that like the Internet. The Internet is already free and open, for the simple reason that competition between providers forces it to be free and open. That’s what customers want. There is no need for the government to intervene to create something that already exists. The unregulated Internet already helps promote entrepreneurship, innovation, and freedom of speech. Let the free economy do what it does best, and stop trying to regulate the Internet!.

Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC’s dangerous new regulations, and protect the future of internet freedom here in America.

Sincerely,

Sonya Ellis
