Dear FCC,

I (like many) strongly suggest you keep net neutrality and ignore any requests wanting to dispose of it. As a Chattanooga, we were fortunate to have EPB Fiber Optics run Comcast out of the ISP market in this city. With EPB, we now have gigabit speeds at more than reasonable prices being delivered in their fiber optic network. Chattanooga would wish this to happen to every city in the US, and keeping net neutrality will allow that to happen. Disposing Net Neutrality would allow ISP's like Time Warner and Comcast to prioritize internet traffic as they see fit. This is a horrible idea. Thank you for listening.

Jacob Miller
