YES to net neutrality, NO to being bought out by the interests of monopolistic cable companies. Any government official who supports the creation of a two-tiered system cannot honestly claim to be working in the best interests of the American people.

The internet in its current form is a open and level platform for innovation, entrepreneurship, and the sharing of ideas and knowledge. Let's turn our efforts toward improving the things that are broken in our society (plenty to keep us occupied there), rather than screwing up the things that are already working well.

Sincerely,

A college student who is tired of watching people in power make transparently selfish decisions that my generation will have to live with and/or spend valuable time and energy correcting.
