Please protect the Internet or else I'm afraid we will be facing breaking up "THE INTERNET" sooner than later.

Big biz can still sink their teeth in this beautiful country into other ventures as I see it.

Protect "NET NEUTRALITY" for as long as we can in the name of Democracy as defined in it's timeless interpretation.

The internet and our newest form of global communication belongs to the whole world.... "yes I just said that".
We are just its stewards.

Why.

We can all get mail, if we try hard.
We can all get water, if we try hard.
We should STILL be able to continue and communicate in the way we have on this system without threat off corporate take over.

Why would we sell the US Post Office?
If you dying to give it to someone, by all means FCC
you and the Post Office Technically are the best qualified to represent all the needs. Not a corporation.

This is as important as a Public Library to many(just not as clean, yet.)

Some will say
"The Anti-Christ gave birth to da interNat and deh Good Lord Sent VeriZan it's friend ComAsTic from BaLazR Inc to fight the evil until it's end!"

To you I say. I just made all that crap up on the fly and others whom have deep interests are more creative and successful than me.

Use your head not you wallet on this one and good people will take note.

We do live in a "Modified Capitalist Culture",
NOT in an "imperialist culture" of our past.

Just because it has some "rough edges" in areas is no reason to "sell it out", just yet.

People of the world deserve more open communication.
Do not fear the future this is where we are meant to go.

Many really feel that more communication across cultures that differ will increase tolerance overall and as a result bridge some of our differences.

DO NOT GIVE THIS OPPORTUNITY FOR THE WORLD TO GROW... OVER SO EASILY WITHOUT CONSIDERING ALL THE POTENTIAL CONSEQUENCES.

Thank you for hearing my sometimes LOUD voice and for giving me the opportunity to express it openly and honestly.

Sincerely,
Kelsie Gene Flynn
