Dear Commissioner,

Please, if you will....

Title II protections, Free & Open Internet. Net Neutrality.

No pay to play priority; no corporate or government limitations on what or how The People communicate.

It's not actually that complicated. Complete transparency at very low or NO cost.

We cannot allow corporations or government to decide what or how information is communicated, and at what speed.

Right now, we need to treat the internet as an open public utility, equally accessible to all.

Thomas Berton
