Internet is not broken. This is the first time we can have open information. I already pay \$130 for internet and TV. Please do not give them more power over us to charge whatever they like where rich get more and middle get less. There is only one cable provider plus Verizon (They are bad) in this area. Brighthouse. There is no competition and they charge what they like. Do not give 2 speeds to them to allow streaming for some and not for others. They are not going broke. NO NET NEUTRALITY.
