Subject: Don't Accept the Deal

I am writing to urge you to oppose the carrier-backed proposal on wireless 9-1-1 location. It is not a consensus agreement and is not supported by those on the front lines of 9-1-1 and public safety, who want to see real improvement now.

The terms of this so-called deal are a travesty for public safety and a tragedy for anyone who depends on a wireless phone in case of emergency. The carrier-backed proposal delays implementation of robust accuracy requirements for years longer than the FCC's proposed rule, offers no vertical accuracy standard or timeline, and abandons millions of users of existing 3G or 4G phones by focusing only on future handset design.

Please do not accept the deal as proposed by the wireless carriers. Don't make the job of saving lives harder than it already is.

Sincerely,  
William P. Ostrander, Jr., Bellingham
