I am writing to urge you to block the merger of Comcast and Time Warner Cable. In the past, I have been both a Time Warner Cable customer in Wisconsin, and a Comcast customer in Illinois. I have had poor experiences with both companies, and a merger between the two will do nothing to make them clean up their acts. In fact, it will encourage them to further abuse their consumer base. Cable is already a defacto monopoly, with most major carriers avoiding areas another dominates so as to not foster competition that would actually be good for the consumer. This allows them to run rampant in customer abuse as the consumer really has no options to choose from. This merger would grant them this defacto control over most of the US which is flat out unacceptable. Both companies already have records of misconduct. What we need is more options, not less.
