As the President of the Colorado Area Leaders in Educational Technology, I am requesting an increase in the E-Rate cap. School districts of all sizes struggle each year to provide the infrastructure, devices and professional development needed to make both 21st Century Skills and technology integration a reality. With the increased demand on these resources coupled with the unfunded mandates of online testing it is impossible for districts to accomplish everything they need to. The funding has not kept pace with the demands, now is the time, if we are going to make a difference funding must be increased.

Regards,
Shelley Kooser
President, CALET
Colorado
