It's absolutely ridiculous we're even considering enabling cable companies to expand their monopolies on internet information and businesses. Eliminating net neutrality would destroy the ability for start-up companies to compete and prevent innovation and growth in our society! The internet is an essential component of education and economics in the 21st century, and we shouldn't be allowing some big corporate bullies to shove everyone else to the ground.

As a 17 year old high school student, I stand in favor of net neutrality. Free and fast internet for all, users and providers alike.
