

To the FCC Regulators:

I am a 65-year-old man on disability, and I'm asking you to please regulate robo-callers.

Despite being on my states No-call List, I have received as many as 5 calls a day from the same numbers. For example area codes 202 and 314. What is most irritating is that if you answer the call, there is no one there.

In addition, these calls frequently interrupt my sleeping hours. You are woke up by the call, and then an hour later, the same caller again wakes you up.

Please block these calls.

Thank you,

Richard Wagner
