CC Docket No. 02-6

To Whom It May Concern:

The Taylor County School District is requesting an expedited review and a one-time waiver from the FCC for the 2014 Form 471 filing deadline. This waiver would enable the school district to proceed with the Form 471 applications and associated funding requests.

Explanation: I am the sole individual in the school district who works with the e-rate program including all applications and vendor correspondence. On March 17th, I underwent emergency eye surgery for a detached retina. Due to the extensive recovery from the medical procedure, I was unable to complete the Form 471 applications and item 21 attachments prior to the March 26th deadline. I called the USAC helpline and was instructed to file the Form 471 applications and related item 21 attachments as soon as possible. I was informed that my applications would be denied and I would then have to file an appeal. I completed the filing of the Form 471 applications and item 21 attachments as soon as I could after I returned to work.

I received notifications from the USAC on August 28th indicating that the Form 471 for Funding Year 2014 was "postmarked outside of the window". This applies to the following 471 applications:

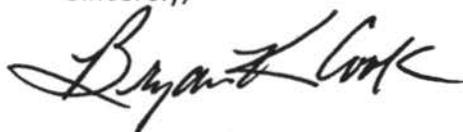

471 App #	FRN
992824	2710768, 2710787, 2710788, 2710789, 2710790
993689	2710967
993549	2710892
993488	2710807

We are asking for your consideration in granting this waiver which will aid us in the materials and services we provide. Our school district relies heavily on the USF funds. Please let me know if you need additional information to proceed with this request.

We anxiously await your decision.
