Please support Net neutrality. Allowing cable companies and phone companies to provide multiple tier services should not be allowed. Our society is already financially unbalanced towards corporations and no longer benefits the average citizens of our country. The internet is the last place where small individuals or business may be able to compete with new ideas and information. We no longer get news from our TV programming and by allowing wealthy people/ corporations the opportunity to pay to have their information delivered faster or with greater priority will even further add to the imbalance in our society.
