How dose telling on a person?s effect the job work force? 1 Hello my name is ERIC DELA PENA and I plead and I decline legal aid council I am well and have been in a good safe place I plead some persons keeps down loading past SEC TCR files and I want it to stop some Asian male who works at the Main library I plead no contest of what the 2012 files it?s a copycat rat is firing investment using TCR files is stating prior legal charges radding has vaporizes advantages telling about a bad thing can decrease time and can cost time in money time matters liberty to place common wealth to pay for an legal case its cost money and in most cases work developments can be seriously injured in the matters SEC TCR the systems to enforce rules about investing can cost more Who?s filing rat race stadiums political dilemmas when a person?s file a rat race type of report it can be deceiving another?s persons such as a lady filing a credit card complaint for example people all had the same problem with credit cards it?s not bad to tell about how the creditor was rat tailing to gain higher savants legal departs for example the police or a treasury when a case or a legal statute is made its can cost taxes when people are misfortune when outweigh our time and money the frustrating when issues with money and finding work can make some people out rake their personnel deals? whatever? is what a folk tale told me when I said please ?stop snatching? an Aisin female along with a Asian male who use to work at the monks church Who?s was paid by SEC rewards program telling a rat race tale meaning its completive can make it addicting to telling radding some others say its way to make money but it can bring misfortunes I didn?t get a payment by SEC most of my statements where type by wiki now wiki had attachments to the words so if someone can?t comprehend the trail of what agency consumers protecting a lot imposters who has been clever on catching false statement made by people I known that the impostors intentions were in good catching another rat was not harmful when someone who was contacted by the federal government the mistakes when managers along mergers stated the truth behind telling ? just today I been satisfied with my life and continue to impeach people who abused the US office of san frabncisoc civil investments and indecent systems as a rat banks with gathers peoples statements now when the monk did what was the interest the girl or God ? its possible the girl might have turn on the heat some people might have thought that Rat racing was a way to gain respect form lady?s I personnel long ago had thought that rating about money and investments was a to gain respects when it about TRC SEC is not fun place so if some person logs on too SEC and file a " Needy statements for money " about the money problems it can back fire I am a homeless man looking for work so when in drought I cope with intentions of others and question myself how would I feel if I got ratted on and had too pay the government millions of dollars for nothing it?s scary that TRC sued the investors and its bad to lose money I take my opportunity this day to stop and rat racing its killing the money when recall data now did Recall file and delete cause recall was shot at by the man who is trying to get SEC rewards payments because the person who was imposing to be a worker at Recall the investors thought the recall employees was the case filers when SEC breech the system they found an positive act form which can isolate the TCR filers cause In a general populated social unit and we have to stop the men from filing rat money cases now its ladies job to file so let us men stop snitching what others are using to fight investors using Securities exchange commission can be long and boring I have to say to the person to stop radding out the poor people of the hood reframe from it it couldn?t work for me cause of the value of interest that SEC used to drown out the bad investors so its kind of position to opt out of big time affairs when rat tailing and Telling ? could delay people from the internal mangers at one source said they hated theirs jobs
