

I would like to submit my opinion against allowing Marriott Hotels to be able to block internet inside their hotels in order to charge meeting groups for Wifi service. Most other major hotel chains that have meeting space that they rent out offer free Wifi service and it has become the norm for groups holding meetings. As a meeting planner for a large government entity in Utah, I would ask that the FCC deny the petition from Marriott hotels so that we can continue to consider holding meetings in their space without the added cost of Wifi service when we don't have that burden elsewhere.

Thank you,
