

60001013511.txt

You have to keep the internet open & free. It is one of the most core aspects of American society & daily life -- and you cannot nor should not choose to hand it over to the telecommunications industry.

As it stands currently, a monopoly has already risen amongst the Telco industry, and not even the mighty FCC has stepped in to stop it.

By taking away a free internet you would be giving all the control to less than 3 or 4 companies, and namely two: Time Warner & Comcast.

Please don't do this -- Keep the internet free, just like America.
