Please, do not allow the cable companies to do what they want. I beg you, please do not mess with the internet by trying to control and throttle it. As a Millennial, I have spent most of my life with the ability to use the internet for school, play, researching, and anything else I have ever needed. The internet is a beautiful resource, and I cannot afford to lose it. My generation understands the internet. We have grown up in it and can comprehend it exceptionally well. Allow our generation to be the caretakers of this entity, not some corporate giant wishing to turn a profit. Please make the decision for the betterment of future generations and not for the betterment of CEO's pockets.
