I believe that the FCC needs to support an open internet, and that passing some pass strong Net Neutrality rules under Title II is probably the best way to go.

The internet should be protected against big cable companies which seem to want to control it. I think that fast and slow lanes on the internet is a really bad idea.

Again. . In short I am asking you to reclassify the internet under Title II in order to protect it and everyone who uses it.

Please DON'T support the Thune/Upton proposal, which I think is intended to confuse and undermine things.
