My family urges the Commission to put a stop to ROBO calls. I suggest denying tariffs to phone companies which allow robo calls and escalate to large fines imposed on phone companies allowing robo calls until they put a stop to it. I am confident that the phone companies can stop the robo calls given the appropriate incentive. In the alternative impose severe criminal sanctions for robo calls. If the Government can ease drop on the phones of foreign heads of state it should be simple to get rid of "Rachel" and "Hello Seniors" robo calls.
