

60001015991.txt

As an LPTV CP holder we cannot proceed to invest in building out our infrastructure to serve our very small and economically disadvantaged community unless and until we have assurances of two things:

- 1) reasonable certainty as to our long term channel assignment
- 2) reasonable certainty that our substantial investment in infrastructure will be protected from displacement and interference for the foreseeable future.

As a non-profit organization serving our community, it would be financially irresponsible to proceed without these reasonable assurances.

Ultimately, our Community has a significant stake in the outcome of these Proceedings as our non-profit is committed to using the LPTV CP as the basis for delivering sophisticated technical training in the community which would otherwise be out of the question.

In short, without a clear path forward to build out the LPTV infrastructure in our community, this opportunity will be irretrievably lost.

Your due consideration of this impact is sincerely appreciated.

Respectfully,

Roger W Fraser
Chairman and Executive Director
Boundary County Community Television
