Re: *Wireless E911 Location Accuracy Requirement*, PS Docket No. 07-114

Dear Ms. Dortch:

On January 22, 2015, Neville Ray, Executive Vice President and Chief Technical Officer, Kathleen Ham, Vice President – Federal Regulatory Affairs, Eric Hagerson, Senior Regulatory Affairs Manager, and the undersigned of T-Mobile USA, Inc. (“T-Mobile”), met with Daniel Alvarez, Public Safety Legal Advisor to the Chairman, Amb. Phil Verveer, Senior Counsel to the Chairman, and Adm. David Simpson, Chief – Public Safety and Homeland Security Bureau.

T-Mobile representatives expressed support for the Commission’s efforts to improve E911 location accuracy and highlighted that the Roadmap for Improving E911 Location Accuracy (“Roadmap”),¹ developed by the four national wireless carriers, APCO and NENA, and subsequent Roadmap modifications submitted by industry signatories,² provide the best path to real, verifiable improvements for locating wireless emergency callers. Specifically, T-Mobile explained that the Roadmap represents a paradigm shift in approaching 911 location accuracy, leveraging commercial Location Based Services, including ongoing improvements to such technologies, to provide what Public Safety and the Commission have stated is the gold standard, a dispatchable location for wireless E911 calls.

¹ Letter from Scott Bergman, Counsel, CTIA—The Wireless Association, to Marlene Dortch, Secretary, Federal Communications Commission, PS Docket No. 07-114 (filed Nov. 18, 2014).

² Letter from Joan Marsh, AT&T Services, Inc., Ray Rothermel, Sprint, Kathleen O’Brien Ham, T-Mobile USA, and Kathleen Grillo, Verizon, to Marlene H. Dortch, Secretary, Federal Communications Commission (filed Jan. 21, 2015).

Pursuant to Section 1.1206 of the Commission's rules, an electronic copy of this letter is being filed in the above-referenced docket.

Sincerely,

A handwritten signature in black ink, appearing to read "Steve B. Sharkey", with a stylized flourish at the end.
