#SaveTheInternet

Please do not allow cable companies to make us pay for fast internet like we have now! All they're going to really do is make it fast for people who can pay, and for people who are just barely getting by with paying their internet bills like me, they're going to make it barely possible to even go on the internet! The internet is my get-away from real world problems, the internet is the only thing that keeps me sane! Please continue allowing the rest of the world the freedom we have on here! The internet is open, free, no rules to follow! It's unlimited unlike the real world!
