

I wish the government would step in and help us consumers! I am looking at the current map for our area provided by the FCC. My local news station KIMT 3 no longer is on my TV. To say I am beyond ticked off would be an understatement. We are forced for what ever reason to watch a channel that doesn't cover our area which is NORTHEAST IOWA. KGAN 2 doesn't cover my region, doesn't provide the weather for our area, nor our local sports teams. I have been given the run around by my local provider, and both stations. I have had it. BUT KIMT won't, for what ever reason, allow my provider to get me the channel.
