Go fuck yourself, Comcast. You rancid fucking dead cunt in a sea of piss. Go eat an entire fucking barrel of putrid cock. You're literally inviting people to stage a fucking revolt.

You don't seem to get what's happening in America right now, because you live in fucking sky castles or under a fucking rock, but lets spell it the fuck out.

We, the actual people of the United States, are getting fed up with your shit, and it is exclusively your shit. Do you think we don't know how deep your fist is into the government's gaping asshole? Are you really that fucking dense?

Because it looks like you're that fucking dense.

You're inviting the entire fucking internet to give you a collective finger. Trying to control the internet oversteps your fucking boundaries, and you're going to have to get used to people actually saying "no" to your face. I know daddy never said no, but as it turns out this is the real fucking world and daddy isn't there to hold your hand and suck your cock.

Go fuck yourself, Comcast. Maybe after snapping your cock off and shoving it in your own shitter you'll come up with a less dumbass business model.
