

II.C.1. If you provide *Best Efforts Business Broadband Internet Access Services* to 15,000 or more customers or 1,500 or more business broadband customers in areas where the *ILEC* is subject to price cap regulation, then answer the following questions:

- a. Did you submit data in connection with the State Broadband Initiative (SBI) Grant Program for 2013?**
- b. Did the data you submitted in connection with the SBI Grant Program in 2013 accurately and completely identify the areas in which you offered *Best Efforts Business Broadband Internet Access Services* and exclude those areas where you did not offer such services as of December 31, 2013?**
 - i. If yes, then provide the list of prices for those *Best Efforts Business Broadband Internet Access Services* that you were marketing in each census block submitted in connection with the SBI Grant Program as of December 31, 2013. If there is a price variation within your service footprint, indicate which prices are associated with which census blocks.**

Response to II.C.1:

Verizon provides Best Efforts Business Broadband Internet Access Services “to 15,000 or more customers or 1,500 or more business broadband customers in areas where the ILEC is subject to price cap regulation.” Verizon submitted data in connection with the State Broadband Initiative Grant Program (SBI) for 2013. However, the data Verizon submitted to SBI did not conform to the specifications of this special access data collection. For example, Verizon’s SBI data are for services offered to residential customers and not business services. Further, Verizon’s SBI data includes services offered at below DS1 level. Therefore, Verizon is hereby submitting the census blocks in which it offered Best Efforts Business Broadband Internet Access Services as of December 31, 2013 (Attachment II.C.1-1) and a list of the prices for those services (Attachment II.C.1-2). These prices are offered on a national basis and do not include promotional offers.
