

60001027756.txt

This country was founded on the principal of freedom, liberty and the pursuit of happiness. The Internet is an infra structure of huge proportions connecting all levels of our society. To limit speeds based on consumerism goes against every principle our country is founded on. Giving so much power to just a few is not a democratic way. Please DO NOT allow cable companies to control Internet speeds! To have a fast and slow delivery speed should be absolutely unthinkable! - Al Button
