Severe concern for inappropriate use of Satellite signals that seem tapped to breach homes where virtual conversations are relayed over electrical appliances, stoves fans, fridge, central air. Stolen voice command from cell phone, used to place people where they are not, also used in home theft, and criminal base shifts. Some are using links to make others seem as the are divulging their homes in order to gain access to homes where ID theft is rampant. False case scenarios set victims up for fall, and org crime and other gangs have tapped and repeat the same. For emergencies calls Virtual calling has advantages, however, in these trial stages, many innocent victims voices are matched and utilized incorrectly or duplicated. Telephone number called on virtual calling has lead persons into ambush. I believe terrorist have convinced some Americans to acquire homes and valuables using these techniques. There seems a need for scramblers especially in homes that have much steel products
