Charlie, Both programs are being implemented in our district. Connectivity through the mobile phones is critical to the safety and security within our district as well as other school districts across the state and nation. Taking this highly effective tool away would compromise the safety of our children and staff. Numerous times in a school shooting where the communication devices failed, texting remained a solid communication technique and the device used was the cell phone. Funds that would remove these devices in a school setting would jeopardize the safety of all the school setting. Especially the children.

Subject: FCC Modernization Order

Rodger – I have attached my rough draft to the FCC to reconsider their Modernization Order. As you know the Order eliminates data plans and air cards on mobile devices beginning July 1, 2015. The Order phases down by 20% each year until 0% is achieved for local/long and cellular voice services.

Could you beef up the attached letter and provide some exhibits that I could include as attachments by this Friday at 12:00 noon?

I appreciate your help with this request. I really believe someone needs to be proactive with the FCC.

Thanks,

Charlie Hobbs
