To Whom It May Concern; Please do not regulate the Internet, especially using the FCC rules used to regulate the telephone industry designed in the early 1900's. Allow the free market to regulate the prices, speeds to those who wish to pay for the higher speed access. Do not force us to pay for those who cannot afford to pay for their own access. Also, this applies to the Cell Phone access as well. Do not attempt to fix something that is not broken.

Thank you,  
Ed
