Regardless of all the partisan fighting on this subject i just ask that you please stop Net Neutrality. I dont agree with much of the mergers and such but getting the Federal Government involved is not the correct action. The entire reason the internet has been such a resounding success is due in large part to it being open for all these years.

There has to be a way to manage to protect the population from the actions of Comcast, Charter etc without heavily regulating the greatest testament to unregulated liberty.

Please DO NOT allow this. We cannot allow our fear to over-rule our understanding of fundamental liberty.
