

To the FCC regarding the proposed Internet takeover by Obama and Wheeler:

Please do all in your power to stop this new proposed Internet law. This is the manifestation of Big Brother and Orwell's 1984. This absolutely can not be allowed to pass. American citizens need more freedom from the power-hungry government and less regulation impeding free market progress. If this passes... our freedoms are gone for good, because this will cause an avalanche of regulations and costs and the removal of all privacy for the American citizen.

I implore you to stop this from taking place.

Sincerely,
Sarah Dunn
Kodiak, Alaska
