Net Neutrality is important to American businesses and our way of life. Do not give in to mega corporations like Comcast and TWC with their power and money. When voting on this issue think about the future of your loved ones. Giving into mega corporations like these insure the destruction of this country and kills any competition and innovation. Please do not take that away from our future. Its currently taking place in this govt as we speak and has been doing so for a long while now. Please vote your conscience and think about your children's future.
