Please reclassify broadband internet as a title II common carrier telecommunications service. The electricity coming into my house is not regulated and nor should my internet connection. After all, this country stands for freedom. The country deserve to be free of ISP control over it's internet data. Allowing them to control how much internet im allowed to access is like paying \$40 for gas at a gas station but the gas station decides i should only get \$30 worth instead, because they earn more profit. Never allow companies to violate our rights and the constitution. Never allow the government to violate our rights and the constitution. This is the land of the free. We shall not forsake ourselves.
