Re: *Ex Parte* Notice: *Terrestrial Use of the 2473-2495 MHz Band for Low-Power Mobile Broadband Networks* – IB Docket No. 13-213

Dear Ms. Dortch:

On February 24, 2015, L. Barbee Ponder IV, General Counsel & Vice President, Regulatory Affairs, for Globalstar, Inc. (“Globalstar”), Steve Berman of Lawler, Metzger, Keeney & Logan, LLC, and I met with Erin McGrath, Legal Advisor to Commissioner Michael O’Rielly. At this meeting, we expressed support for the rules the Commission proposed in November 2013 to allow Globalstar to provide low-power terrestrial mobile broadband service (Terrestrial Low Power Service or “TLPS”) in its own licensed spectrum at 2483.5-2495 MHz and adjacent, unlicensed spectrum at 2473-2483.5 MHz.¹ We urged the Commission to adopt its proposed rules expeditiously to add 22 megahertz to the nation’s wireless broadband spectrum inventory and ease the congestion that is diminishing the quality of Wi-Fi service at high-traffic 802.11 hotspots and other locations. We also updated Ms. McGrath on the status of upcoming technical demonstrations of TLPS at the Commission.

Pursuant to section 1.1206(b)(2) of the Commission’s rules, 47 C.F.R. § 1.1206(b)(2), this *ex parte* notification is being filed electronically for inclusion in the public record of the above-referenced proceeding.

Respectfully submitted,

/s/ Regina M. Keeney
Regina M. Keeney

cc: Erin McGrath
