

## Limitless Sky Records

Regarding Shure Inc. GN Docket No. 14-166

To Whom It May Concern:

I am a IATSE Local 695 Sound Mixer working in Hollywood. Like my fellow Sound Mixers, I am a freelance contractor. It is essential that the limit for UHF should stay at 250 mW and that the limit for VHF should be raised to 250 mW.

Reducing this limit will render my equipment illegal and will cause me to not be able to meet current expectations of clients.

In my professional opinion, Sure Inc. has filed this docket as a means to reduce its competition as they hold almost no market share in our field.

In contrast, raising the VHF transmitter power to 250mW will aid us in our work.

Thank you for your consideration.

Sincerely,

Michel Tyabji
