I just contacted my Congressman and both senators. I want you to know my gripe with this takeover; "Control the medium and the government controls the message content."

I'm curious why Chairman Tom Wheeler suddenly endorsed Net Neutrality, which he previously opposed. Is he doing President Obama's bidding? Is Obama doing the bidding of wealthy campaign donors?

But what's worse...

The FCC makes laws without the Congressional process! Just like other agencies that impose laws without our consent, this mocks our representative government.

Even worse...

"Net Neutrality" is a terrible idea!

Think about it: A multi-tiered Internet might actually IMPROVE it and drive progress.

Remember...

- * In 1900, only the rich could buy automobiles.
- * 70 years ago, only the rich could buy televisions.
- * Just 20 years ago, only the rich had cell phones.

Why then, should people, even "the rich," be blocked from premium, innovative Internet services that the rest of us can benefit from a few years later?

The FCC wants to hold the Internet back, and ALL of us back.

And I do NOT consent!
