In regards to the net neutrality that has been agreed to by your organization, I strongly urge you to reconsider your decision for several reasons. The idea that the internet needs to be monitored is absurd. It has thrived with invention for the simple fact that nothing has impeded its natural progress. As soon as anyone one organization takes control of it, the internet will become hindered with paperwork and processes that will hold up, or completely discourage invention. Also, the internet is the dictionary definition of the First Amendment of the U.S. Constitution. It perfectly illustrates the American idea of free speech as well as the idea of American Capitalism. To regulate the internet would be to regulate free speech and capitalism. For these reasons, I strongly urge you to reconsider the decision to control the free flowing internet and to leave it to the American people. Thank you.
