American citizens do not want net neutrality to be compromised. Allowing cable companies to have a "hyper speed" lane, while the rest of us have a "fast" lane is a euphemism for allowing these companies to manipulate our internet service to their advantage.

Do not allow cable companies to have special access to the internet, it goes against everything the free internet stands for! We should all have equal rights and access to the internet! I am literally afraid for what kind of world this will be if we begin to allow the control of the internet. This is a new form of discrimination being presented in one of the few platforms that Americans are all still equal and where money doesn't rule. It is for the people. By the people! FCC needs to recognize that cable companies WILL and HAVE slowed internet communications to their advantage. This is madness.

FCC is supposed to watch out for the public safety, please do so and protect net neutrality!
