Comment: The Proposed Rule of Promoting Diversification of Ownership in Broadcasting Services is something which is urgently needed. I am glad the FCC has taken steps in order to diversify this field of communications. Making improvements in the collection of data is vital in securing this goal of diversification. The media is such a powerful force in our society; therefore the FCC is correct in attempting to accurately reflect the makeup of our nation in broadcast ownership. Having a high concentration of ownership in one particular group is dangerous because it shuts down the perspectives of other groups, which leads to marginalization. In this representative democracy, it is important that we are not only represented in government but in the media as well. The media has a strong psychological effect on everyone, especially young adults and children. Implementing new mechanisms via CORES is critical; I dont see any faults within this proposal.
