Dear Secretary Marlene H. Dortch:

One Ministries, Inc. (OMI) supports Gray Television's request to allow LPTV stations a path to Class A status. These local stations provide a tremendous community service. Consequently, most of the open channels post auction will be low VHF channels which don't work as well as high VHF or UHF channels. So, OMI additionally requests that the Commission expand the LPTV must-carry rules to encompass all Class A stations.

OMI also requests that those Class A stations that voluntarily move to a lower band during the auction be able to relocate anywhere with their current market provided there is available of spectrum. In order to remain viable it may be necessary to move more than 30 miles and to also change city of license as a result of the move, and OMI requests that these kinds of moves would entertained.

Sincerely,

Keith Leitch
President, One Ministries, Inc.
