As a business start up owner I find that the consideration of this act unconscionable. This goes against everything that America stands for and hinders the ability for small internet businesses to succeed.

If you go through with this and give Comcast and Time Warner more power we might as well give up on the principals of a true capitalist economy.

I can't even believe that this is even being considered and it scares me that we would allow Enterprise companies to take advantage of the average american.

One of the main purposes of our government is to protect the people from not only monopolies but from any threat to our capitalist society.
