Net Neutrality is important to Americans. You are giving the cable companies more power and money. Do not do this please. You will destroy the nature of america as we have only seen economic growth because of our booming tech sector. You will destroy the american dream and our greatest export. You do not see what is right in front of you. Grow a pair of balls and fight for your nation. You have no sense if you do not maintain net neutrality. The fact that this issue is even being debated is ridiculous. You are a bunch of communists and should resign for even considering this change. You will stop the emergence of new internet technologies halting the creation of many of the products we love. With you in control we would have no Spotify, Amazon, Facebook, etc... The FCC has continuously supported the wrong side. You banned hip-hop albums that were awesome. You gave Eminem crap. You should wake up. Eminem and hip-hop are huge today, bigger than ever. You should not be able to wield the power you do. I would not allow you to make this change. President Obama needs to step in but he probably won't. I hope you have a good night and wake up from your stupidity. You need to think about your role on earth and in our great nation.

God Bless America,

Harri son Ferber
