Signed up on Do not call list. Got calls anyway, does not work. Signed up on NOMOROBO last year, home number, landline. Works great. Now getting calls on cell phone. I use T-Mobile. Nomorobo says they do not support Nomorobo. All mobile carriers should support Nomorobo as should the FCC. At least it works and saves lots of time by not having to answer all these sales calls. If phone rings more than once we answer if not the caller is blocked. NOMOROBO has the answer , why not use it.
