I live in Wyoming. Presently I have to watch Salt Lake City, UT local news. I do have any local Wyoming news available on Dish. I would like to be able to follow Wyoming news. Whether it is The Wy Legislature, Wyoming Cowboys, Casper news, etc. I would like to be informed of Wyoming news. I don't know who has made the decision in the past to separate my family and me from my State, but I do not appreciate it. Big or small, people of my State should be able to avail themselves of happenings of our State, not adjoining states. I find it ironic that I must pay for out of state local news, a service I did not request nor do I want. I would suggest to you that the regulations, or laws (which I question) not require that I, as a resident of Wyoming, be forced to watch local news from another state. I suspect there are many people living around the perimeter of Wyoming who are forced to watch local news from across the state line would agree with me, we would like to receive local news from our state, not from out of state.
