I support this proposal. LPFMs put the "community" back in radio. In our community, our LPFM is first with many weather alerts and important information. This increase will help our local LPFM be listened to better in buildings and in lower areas of the county in elevation. Help LPFMs continue to grow with this increase. It's time for radio to serve the public again, not just serve the bottom line. LPFM gives back to the community tenfold over FM.
