Please recognize my support in getting Wyoming Public Television and other Wyoming based stations (e.g. Cheyenne, Casper) available through Direct TV to zip code 82070! I have made several calls and complaints with them directly about the fact that I am forced to watch Denver based stations which are not only 180 miles away, but are not relevant to me. Also, there is a huge safety concern with severe weather conditions not being available to me through this paid service which should provide a local Wyoming station not ones in another state and ones that are down stream of the prevailing weather patterns or late to provide relevant information. I want my Wyoming stations on my paid service please! I was told there was a a dispute between the owners of the local TV stations over fees between states and Direct TV regarding what they are willing to pay? We need government to step in now to force action especially as it pertains to the safety issue above. This is not a person convenience; it is a matter of public safety. Please intervene and get this issue resolved!
