Thank you for taking the time to read my comments. Our radio station(WKOT-LP 102.1 FM) is a vital link of communication to our listening area. We seek to keep them informed of local events, news and weather. Also the educational and instructional information that we give them is valuable not only to the adult listeners but very important to the teens and young adults. We have an additional 2000 to 3000 new homes being built in our listening area. An increase in power to 250 watts (or whatever) would give us a much greater opportunity to reach inside the four walls of their houses and not just their automobiles. Please consider our requests for increased power and also for all of the other LPFM Stations. Thank you so much of your time. John Thompson, Station Manager
